Modul 4 A - Separater Anhang 4-H.2 (Teil 1)

Refraktäre oder rezidivierte pädiatrische akute lymphatische B-Zell-Leukämie

Studie CCTL019B2205J (ENSIGN)

Stand: 31.08.2023

Table of Contents

Table 31a
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age
Full analysis set

Age: <10 years

	All patients N=20			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	14 (70.0)	(45.7, 88.1)	14 (70.0)	(45.7, 88.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	14 (70.0)	(45.7, 88.1)	14 (70.0)	(45.7, 88.1)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31a
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age
Full analysis set

Age: >=10 years to <18 years

	All patients N=34			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	25 (73.5)	(55.6, 87.1)	25 (73.5)	(55.6, 87.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	24 (70.6)	(52.5, 84.9)	24 (70.6)	(52.5, 84.9)
With bone marrow 0.01% <= MRD% < 5%	1 (2.9)		1 (2.9)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31a
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Age
Full analysis set

Age: >=18

	All patients N=10			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	6 (60.0)	(26.2, 87.8)	6 (60.0)	(26.2, 87.8)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	5 (50.0)	(18.7, 81.3)	5 (50.0)	(18.7, 81.3)
With bone marrow 0.01% <= MRD% < 5%	1 (10.0)		1 (10.0)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31b
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Gender
Full analysis set

Gender: Male

	All patients N=30			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	23 (76.7)	(57.7, 90.1)	23 (76.7)	(57.7, 90.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	22 (73.3)	(54.1, 87.7)	22 (73.3)	(54.1, 87.7)
With bone marrow 0.01% <= MRD% < 5%	1 (3.3)		1 (3.3)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31b
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Gender
Full analysis set

Gender: Female

	All patients N=34			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	22 (64.7)	(46.5, 80.3)	22 (64.7)	(46.5, 80.3)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	21 (61.8)	(43.6, 77.8)	21 (61.8)	(43.6, 77.8)
With bone marrow 0.01% <= MRD% < 5%	1 (2.9)		1 (2.9)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31c
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race
Full analysis set

Race: White

	All patients N=52			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	36 (69.2)	(54.9, 81.3)	36 (69.2)	(54.9, 81.3)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	34 (65.4)	(50.9, 78.0)	34 (65.4)	(50.9, 78.0)
With bone marrow 0.01% <= MRD% < 5%	2 (3.8)		2 (3.8)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31c
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race
Full analysis set

Race: Asian

	All patients N=5			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	3 (60.0)	(14.7, 94.7)	3 (60.0)	(14.7, 94.7)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	3 (60.0)	(14.7, 94.7)	3 (60.0)	(14.7, 94.7)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31c
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Race
Full analysis set

Race: Other

	All patients N=7			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	6 (85.7)	(42.1, 99.6)	6 (85.7)	(42.1, 99.6)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	6 (85.7)	(42.1, 99.6)	6 (85.7)	(42.1, 99.6)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31d
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Ethnicity
Full analysis set

Ethnicity: Hispanic or Latino

	All patients N=25			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	23 (92.0)	(74.0, 99.0)	23 (92.0)	(74.0, 99.0)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	23 (92.0)	(74.0, 99.0)	23 (92.0)	(74.0, 99.0)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31d
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Ethnicity
Full analysis set

Ethnicity: Other

	All patients N=39			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	22 (56.4)	(39.6, 72.2)	22 (56.4)	(39.6, 72.2)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	20 (51.3)	(34.8, 67.6)	20 (51.3)	(34.8, 67.6)
With bone marrow 0.01% <= MRD% < 5%	2 (5.1)		2 (5.1)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31e
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Response status at study entry
Full analysis set

Response status at study entry: Primary refractory

	All patients N=7			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	4 (57.1)	(18.4, 90.1)	4 (57.1)	(18.4, 90.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	4 (57.1)	(18.4, 90.1)	4 (57.1)	(18.4, 90.1)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31e
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Response status at study entry
Full analysis set

Response status at study entry: Relapsed disease

	All patients N=57			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	41 (71.9)	(58.5, 83.0)	41 (71.9)	(58.5, 83.0)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	39 (68.4)	(54.8, 80.1)	39 (68.4)	(54.8, 80.1)
With bone marrow 0.01% <= MRD% < 5%	2 (3.5)		2 (3.5)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31f
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Philadelphia chromosome/BCR-ABL
Full analysis set

Philadelphia chromosome/BCR-ABL: Positive

	All patients N=2			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	2 (100.0)	(15.8, 100.0)	2 (100.0)	(15.8, 100.0)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	2 (100.0)	(15.8, 100.0)	2 (100.0)	(15.8, 100.0)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31f
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Philadelphia chromosome/BCR-ABL
Full analysis set

Philadelphia chromosome/BCR-ABL: Negative

	All patients N=62			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	43 (69.4)	(56.3, 80.4)	43 (69.4)	(56.3, 80.4)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	41 (66.1)	(53.0, 77.7)	41 (66.1)	(53.0, 77.7)
With bone marrow 0.01% <= MRD% < 5%	2 (3.2)		2 (3.2)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31g
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by MLL rearrangement
Full analysis set

Mixed-lineage leukemia rearrangement: Yes

	All patients N=3			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	1 (33.3)	(0.8, 90.6)	1 (33.3)	(0.8, 90.6)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	1 (33.3)	(0.8, 90.6)	1 (33.3)	(0.8, 90.6)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31g
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by MLL rearrangement
Full analysis set

Mixed-lineage leukemia rearrangement: No

	All patients N=61			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	44 (72.1)	(59.2, 82.9)	44 (72.1)	(59.2, 82.9)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	42 (68.9)	(55.7, 80.1)	42 (68.9)	(55.7, 80.1)
With bone marrow 0.01% <= MRD% < 5%	2 (3.3)		2 (3.3)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31h
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Hypodiploidy
Full analysis set

Hypodiploidy: No

	All patients N=63			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	45 (71.4)	(58.7, 82.1)	45 (71.4)	(58.7, 82.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	43 (68.3)	(55.3, 79.4)	43 (68.3)	(55.3, 79.4)
With bone marrow 0.01% <= MRD% < 5%	2 (3.2)		2 (3.2)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31i
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by BCR-ABL1-like
Full analysis set

BCR-ABL1-like: Yes

	All patients N=4			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	4 (100.0)	(39.8, 100.0)	4 (100.0)	(39.8, 100.0)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	4 (100.0)	(39.8, 100.0)	4 (100.0)	(39.8, 100.0)
With bone marrow 0.01% <= MRD% < 5%	0		0	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31i
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by BCR-ABL1-like
Full analysis set

BCR-ABL1-like: No

	All patients N=60			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	41 (68.3)	(55.0, 79.7)	41 (68.3)	(55.0, 79.7)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	39 (65.0)	(51.6, 76.9)	39 (65.0)	(51.6, 76.9)
With bone marrow 0.01% <= MRD% < 5%	2 (3.3)		2 (3.3)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31j
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Complex Karyotypes
Full analysis set

Complex karyotypes II (>=5 unrelated abnormalities) : Yes

	All patients N=19			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	17 (89.5)	(66.9, 98.7)	17 (89.5)	(66.9, 98.7)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	16 (84.2)	(60.4, 96.6)	16 (84.2)	(60.4, 96.6)
With bone marrow 0.01% <= MRD% < 5%	1 (5.3)		1 (5.3)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31j
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Complex Karyotypes
Full analysis set

Complex karyotypes II (>=5 unrelated abnormalities) : No

	All patients N=45			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	28 (62.2)	(46.5, 76.2)	28 (62.2)	(46.5, 76.2)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	27 (60.0)	(44.3, 74.3)	27 (60.0)	(44.3, 74.3)
With bone marrow 0.01% <= MRD% < 5%	1 (2.2)		1 (2.2)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31k
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Region
Full analysis set

Region: US

	All patients N=64			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	45 (70.3)	(57.6, 81.1)	45 (70.3)	(57.6, 81.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	43 (67.2)	(54.3, 78.4)	43 (67.2)	(54.3, 78.4)
With bone marrow 0.01% <= MRD% < 5%	2 (3.1)		2 (3.1)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31l
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Prior SCT therapy
Full analysis set

Prior SCT therapy: Yes

	All patients N=28			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI
Achieved BOR of CR or CRi within 3 months	19 (67.9)	(47.6, 84.1)	19 (67.9)	(47.6, 84.1)
With bone marrow MRD negative (i.e. MRD% < 0.01%)	18 (64.3)	(44.1, 81.4)	18 (64.3)	(44.1, 81.4)
With bone marrow 0.01% <= MRD% < 5%	1 (3.6)		1 (3.6)	
With bone marrow MRD% >= 5%	0		0	
Bone marrow MRD not available	0		0	

- CR=Complete remission; CRi=Complete remission with incomplete blood count recovery; BOR=Best overall response
- The 95% CIs are exact Clopper-Pearson CIs.
- MRD status defined by the minimum MRD% within the corresponding time frame.

Table 31l
Bone marrow minimum residual disease (MRD) status by flow cytometry within 3 months post CTL019 infusion by local investigator assessment and IRC assessment by Prior SCT therapy
Full analysis set

Prior SCT therapy: No

	All patients N=36			
	Local assessment		IRC assessment	
	n (%)	95% CI	n (%)	95% CI

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174a
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age
Safety Set

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174a
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Age

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174b
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174b
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174c
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race
Safety Set

Timing: within 8 weeks post infusion, Race: White

			All patients N=52

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174d
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174d
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174e
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Safety Set

Timing: Any time post CTL019 infusion, Response status at study entry: Relapsed disease

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174j
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes
Safety Set

Timing: within 8 weeks post infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

			All patients N=19		
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174j
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes
Safety Set

Timing: Any time post CTL019 infusion, Complex karyotypes II (>=5 unrelated abnormalities) : No

			All patients N=45

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174k
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174k
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region
Safety Set

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174l
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174l
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy
Safety Set

Timing: Any time post CTL019 infusion, Prior SCT therapy: Yes

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174l
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174m
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT
Safety Set

Timing: within 8 weeks post infusion, Eligibility for SCT: Yes

Orthostatic hypotension	1 (7.1)	0	1 (7.1)	0	0

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174m
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT
Safety Set

Timing: within 8 weeks post infusion, Eligibility for SCT: No

			All patients N=50

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174m
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT
Safety Set

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: within 8 weeks post infusion, Baseline bone marrow tumor burden: Low

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

Hot flush	1 (5.0)	1 (5.0)	0	0	0

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174n
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: Any time post CTL019 infusion, Baseline bone marrow tumor burden: High

			All patients N=44		
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	44 (100)	0	5 (11.4)	6 (13.6)	33 (75.0)

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174o

Hypertension	1 (20.0)	0	1 (20.0)	0	0
Hypotension	1 (20.0)	0	0	0	1 (20.0)

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174o
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence
Safety Set

Timing: Any time post CTL019 infusion, Baseline extramedullary disease presence: No

			All patients N=59

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174q
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174q
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency

of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Number of previous relapses: 1

			All patients N=19

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 174r
Adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility

- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 175f
Adverse events before study treatment, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 175f
Adverse events before study treatment, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL
Enrolled set

- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion,

are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 175n
Adverse events before study treatment, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Enrolled set

Baseline bone marrow tumor burden: Low

	All patients N=22				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	15 (68.2)	1 (4.5)	1 (4.5)	7 (31.8)	6 (27.3)
Blood and lymphatic system disorders					
-Total	11 (50.0)	0	0	8 (36.4)	3 (13.6)
Anaemia	7 (31.8)	0	0	7 (31.8)	0
