- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184a

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184b

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184b
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender

Skin and subcutaneous tissue disorders					

Timing: Any time post CTL019 infusion, Race: Asian

Group term Preferred term	All patients N=5 All grades n (%)	Grade 1 n (%)	Grade 2 n (%)	Grade 3 n (%)	Grade 4 n (%)
-Total	1 (20.0)	0	1 (20.0)	0	0
Rash	1 (20.0)	0	1 (20.0)	0	0
Vascular disorders					
-Total	1 (20.0)	0	0	1 (20.0)	0
Embolism	1 (20.0)	0	0	1 (20.0)	0
Hypertension	1 (20.0)	0	1 (20.0)	0	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184c
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Race
Safety Set

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184d
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184e
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Safety Set

Timing: within 8 weeks post infusion, Response status at study entry: Primary refractory

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184e

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184i
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and BCR-ABL1-like

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184k

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184m
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184n
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184o
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184o
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184p
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Down syndrome
Safety Set

Timing: >1 year post-CTL019 infusion, Down syndrome: Yes

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184r

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184r
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 184r
Adverse events post CTL019 infusion, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all

grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all

grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 186f
Adverse events during the lymphodepleting period, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL
Enrolled set - Patients who received lymphodepleting chemotherapy

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 186o
Adverse events during the lymphodepleting period, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 186r
Adverse events during the lymphodepleting period, in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188c
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Race

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188c
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Race

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188d
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Ethnicity

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188e
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Response status at study entry

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188f
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Philadelphia chromosome/BCR-ABL

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188j

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188l
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Prior SCT therapy

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188m
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188n
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188o
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188p
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Down syndrome

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188q
Adverse events in at least 10% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime during the study by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188q

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all

grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 188r

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 189b
Severe adverse events (AE CTCAE Grade 3/4) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Gender
Safety Set

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 189j
Severe adverse events (AE CTCAE Grade 3/4) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes

Timing: >1 year post-CTL019 infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

	All patients N=11		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Respiratory tract infection viral	1 (9.1)	1 (9.1)	0
Urinary tract infection	1 (9.1)	1 (9.1)	0
Investigations			
-Total	2 (18.2)	2 (18.2)	0
Lymphocyte count decreased	1 (9.1)	1 (9.1)	0
White blood cell count decreased	1 (9.1)	1 (9.1)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 189j
Severe adverse events (AE CTCAE Grade 3/4) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes
Safety Set

-Total	2 (3.6)	2 (3.6)	0
Epistaxis	1 (1.8)	1 (1.8)	0
Pulmonary oedema	1 (1.8)	1 (1.8)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 189k
Severe adverse events (AE CTCAE Grade 3/4) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Region
Safety Set

Timing: >1 year post-CTL019 infusion, Region: US

Hypotension	11 (25.0)	4 (9.1)	7 (15.9)

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 189n
Severe adverse events (AE CTCAE Grade 3/4) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden
Safety Set

Timing: >8 weeks to 1 year post CTL019 infusion, Baseline bone marrow tumor burden: Low

Hypotension	11 (34.4)	4 (12.5)	7 (21.9)

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 189r
Severe adverse events (AE CTCAE Grade 3/4) post CTL019 infusion that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
Safety Set

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion,

are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 190o
Severe adverse events (AE CTCAE Grade 3/4) before study treatment that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), by primary system organ class, preferred term, maximum CTC grade and Baseline extramedullary disease presence
Enrolled set

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility.
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 191m
Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Eligibility for SCT

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs started between the first day of lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all

grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 191q
Severe adverse events (AE CTCAE Grade 3/4) during lymphodepleting period that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients), regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion
Enrolled set - Patients who received lymphodepleting chemotherapy

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 192b

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 192g
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 192j

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and

accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 192q
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) by primary system organ class, preferred term, maximum CTC grade and Time since enrollment to CTL019 infusion
Enrolled set – non – infused patients

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 192r

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 193b

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 193c

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 193h

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 193m

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 193r
Severe adverse events (AE CTCAE Grade 3/4) that occurred in at least 5% of the patients OR (in at least 10 patients AND in at least 1% of the patients) at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
