- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 175n
Adverse events before study treatment, by primary system organ class, preferred term, maximum CTC grade and Baseline bone marrow tumor burden

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of

all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 176g
Adverse events during the lymphodepleting period, regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and MLL rearrangement
Enrolled set - Patients who received lymphodepleting chemotherapy

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility

- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started between the first day of Lymphodepleting chemotherapy and CTL019 infusion

(for patients who were infused) are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all

grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 178c
Adverse events at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Race
Enrolled set

Race: Asian

	All patients N=6				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	6 (100)	0	1 (16.7)	2 (33.3)	3 (50.0)
Blood and lymphatic system disorders					
-Total	3 (50.0)	0	1 (16.7)	1 (16.7)	1 (16.7)
Anaemia	3 (50.0)	0	1 (16.7)	2 (33.3)	0

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.

- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 178e
Adverse events at anytime post-enrollment by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Enrolled set

Response status at study entry: Primary refractory

	All patients N=8				
Primary system organ class Preferred term	**All grades n (%)**	**Grade 1 n (%)**	**Grade 2 n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	8 (100)	0	0	1 (12.5)	7 (87.5)
Blood and lymphatic system disorders					
-Total	6 (75.0)	0	0	4 (50.0)	2 (25.0)
Anaemia	5 (62.5)	1 (12.5)	0	3 (37.5)	1 (12.5)
Febrile neutropenia	4 (50.0)	0	0	4 (50.0)	0
Neutropenia	2 (25.0)	0	0	0	2 (25.0)
Thrombocytopenia	2 (25.0)	0	0	1 (12.5)	1 (12.5)
Cardiac disorders					
-Total	3 (37.5)	1 (12.5)	0	2 (25.0)	0
Left ventricular dysfunction	2 (25.0)	0	0	2 (25.0)	0
Tachycardia	2 (25.0)	1 (12.5)	0	1 (12.5)	0
Palpitations	1 (12.5)	1 (12.5)	0	0	0

Response status at study entry: Primary refractory

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 178g

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Serious adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Ethnicity
Safety Set

Timing: >1 year post-CTL019 infusion, Ethnicity: Hispanic or Latino

		All patients N=17	
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Number of patients with at least one AE	2 (11.8)	1 (5.9)	1 (5.9)
Blood and lymphatic system disorders			
-Total	1 (5.9)	0	1 (5.9)
Febrile neutropenia	1 (5.9)	0	1 (5.9)
Gastrointestinal disorders			
-Total	1 (5.9)	0	0
Diarrhoea	1 (5.9)	0	0
Infections and infestations			
-Total	1 (5.9)	1 (5.9)	0
Cellulitis of male external genital organ	1 (5.9)	1 (5.9)	0
Urinary tract infection	1 (5.9)	1 (5.9)	0

Timing: >1 year post-CTL019 infusion, Ethnicity: Hispanic or Latino

	All patients N=17		
Group term Preferred term	**All grades n (%)**	**Grade 3 n (%)**	**Grade 4 n (%)**
Injury, poisoning and procedural complications			
-Total	1 (5.9)	1 (5.9)	0
Procedural pain	1 (5.9)	1 (5.9)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.

- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 179j
Serious adverse events post CTL019 infusion, regardless of study drug relationship, by primary system organ class, preferred term, maximum CTC grade and Complex Karyotypes
Safety Set

Timing: >1 year post-CTL019 infusion, Complex karyotypes II (>=5 unrelated abnormalities) : Yes

		All patients N=11

Acute respiratory failure	1 (1.8)	0	1 (1.8)
Pulmonary oedema	1 (1.8)	1 (1.8)	0

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.

- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- A patient with multiple adverse events within a group term is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- Preferred terms are presented within group term in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of

all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility
- Only AEs started prior to any study treatment, i.e. prior to lymphodepleting chemotherapy and CTL019 infusion, are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Epistaxis	1 (2.0)	1 (2.0)	0

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion

(for patients who were infused) are summarized
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
Only AEs started after the first day of Lymphodepleting chemotherapy and CTL019 infusion (for patients who were infused) are summarized
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of

all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 181r
Serious adverse events during the lymphodepleting period, regardless of relationship to lymphodepleting chemotherapy, by primary system organ class, preferred term, maximum CTC grade and Number of previous relapses
Enrolled set - Patients who received lymphodepleting chemotherapy

Aspiration	1 (100)	0	1 (100)
Hypoxia	1 (100)	1 (100)	0

Response status at study entry: Primary refractory

Group term Preferred term	All patients N=1 All grades n (%)	 Grade 3 n (%)	 Grade 4 n (%)
Vascular disorders			
-Total	1 (100)	0	1 (100)
Hypotension	1 (100)	0	1 (100)

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

Table 182e
Serious adverse events by primary system organ class, preferred term, maximum CTC grade and Response status at study entry
Enrolled set – non – infused patients

Response status at study entry: Relapsed disease

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- Only AEs occured to non-infused patients are summarized.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.

- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.

- Enrolled set = All patients who meet all inclusion/exclusion criteria, and whose apheresis product is received and accepted by the manufacturing facility.
- A patient with multiple adverse events within a primary system organ class is counted only once in the total row.
- A patient with multiple occurrences of an AE is counted only once in the AE category at the maximum toxicity grade.
- System organ classes are presented in alphabetical order; preferred terms are presented in descending frequency of all grades column, as reported in the All patients column.
- MedDRA version 22.0 and CTCAE version 4.03 have been used for the reporting of adverse events.
