

of the Federal Joint Committee (G-BA) on an Amendment of the Pharmaceuticals Directive (AM-RL):

Annex XII – Resolution on the Benefit Assessment of Medicinal Products with New Active Ingredients according to Section 35a SGB V - Doravirine/Lamivudine/Tenofovir Disoproxil

of 4 July 2019

At its session on 4 July 2019, the Federal Joint Committee (G-BA) resolved to amend the Directive on the Prescription of Medicinal Products in SHI-accredited Medical Care (Pharmaceuticals Directive, AM-RL) in the version dated 18 December 2008/22 January 2009 (Federal Gazette, BAnz. No. 49a of 31 March 2009), as last amended on DD Month YYYY (Federal Gazette, BAnz AT DD MM YYYY BX), as follows:

I. Annex XII shall be amended in alphabetical order to include the active ingredient combination doravirine/lamivudine/tenofo@r disoproxil as follows:

habeti ine/tenofor the contraction the contrac

## Doravirine/Lamivudine/Tenofovir Disoproxil

Resolution of: 4 July 2019 Entry into force on: 4 July 2019 Federal Gazette, BAnz AT DD MM YYYY Bx

## Therapeutic indication (according to the marketing authorisation of 22 November 2018):

Delstrigo<sup>®</sup> is indicated for the treatment of adults infected with the human immunodeficiency virus (HIV-1). The HI viruses must not have mutations known to be associated with resistance to the NNRTI (non-nucleosidic reverse transcriptase inhibitor) class of substances, lamivudine, or tenofovir.

## 1. Additional benefit of the medicinal product in relation to the appropriate comparator therapy

a) Therapy-naïve adult HIV-1 patients in whom the HI viruses have no mutations known to be associated with resistance to the NNRTI class of substances, landvudine, or tenofovir

### Appropriate comparator therapy:

Rilpivirine in combination with tenofovir disoproxil/alafenamide plus emtricitabine or in combination with abacavir plus lamivudine

or

Dolutegravir in combination with tenofovir disoproxil/alafenamide plus emtricitabine or in combination with abacavir plus lamivudine

## Extent and probability of the additional benefit of doravirine/lamivudine/tenofovir disoproxilcompared with dolutegravir:

An additional benefit is not proven.

b) Therapy experienced adult HIV-1 patients in whom the HI viruses have no mutations known to be associated with resistance to the NNRTI class of substances, lamivudine, or ten<u>ofovir</u>

# Appropriate comparator therapy:

Individual anti-retroviral therapy depending on the previous therapy(ies) and taking into account the reason for the change of therapy, in particular therapy failure because of virological failure and possible associated development of resistance or because of side effects

Extent and probability of the additional benefit of doravirine/lamivudine/tenofovir disoproxilcompared with the appropriate comparator therapy:

An additional benefit is not proven.

## Study results according to endpoints:1

a) <u>Therapy-naïve adult HIV-1 patients in whom the HI viruses have no mutations known to</u> <u>be associated with resistance to the NNRTI class of substances, lamivudine, or tenofovir</u>

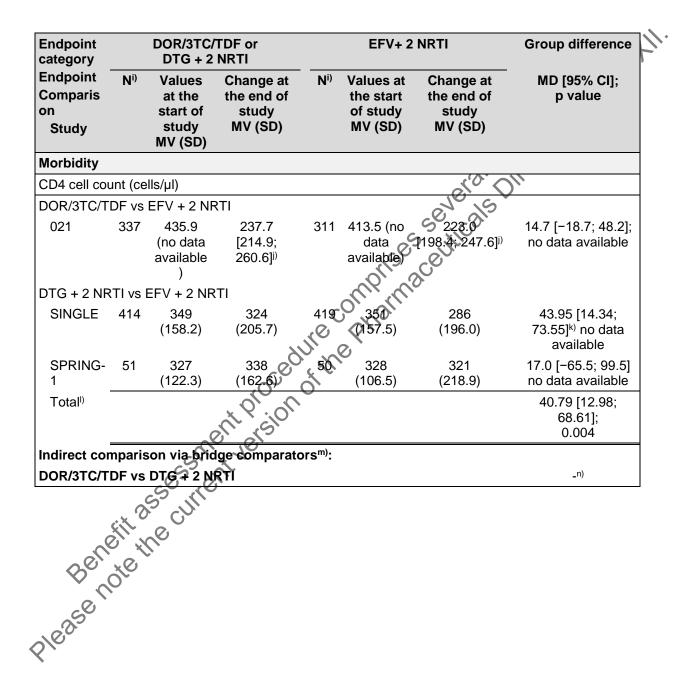

Indirect comparison: doravirine/lamivudine/tenofovir disoproxil (DOR/3TC/TDF) + 2 NRTI (RCT 021) vs dolutegravir (DTG) + 2 NRTI (RCTs SINGLE, SPRING-1) via the bridge comparator efavirenz (EFV):

## 3. Requirements for a quality-assured application

The requirements of the product information are to be taken into account. The European Medicines Agency (EMA) provides the contents of the product information (summary of product characteristics, SmPC) for Delstrigo<sup>®</sup> (active ingredient combination:doravirine/lamivudine/tenofovir disoproxil) at the following publicly accessible link (last access: 27 May 2019):

https://www.ema.europa.eu/documents/product-information/delstrigo-epar-product-information\_de.pdf

Treatment with doravirine/lamivudine/tenofovir disoproxil should only be initiated and monitored by specialists who are experienced in the treatment of patients with HIV-1.

## 4. Treatment costs

### Annual treatment costs:

a) <u>Therapy-naïve adult HIV-1 patients in whom the HI viruses have no mutations known to</u> be associated with resistance to the NNRTI class of substances, lamivudine, or tenofovir

Designation of the therapy	Annual treatment costs/patient
Medicinal product to be assessed:	
Doravirine/lamivudine/tenofovir disoproxil	€9,505257
Appropriate comparator therapy:	
Dolutegravir/abacavir/lamivudine	€14,857.19
Dolutegravir + emtricitabine/tenofovir alafenamide	€14,628.02
Dolutegravir + emtricitabine/tenofovir disoproxil	€9,194.17
Rilpivirine + abacavir/lamivudine	€10,058.31
Rilpivirine + emtricitabine/tenotovir alafenamide	€10,508.55
Rilpivirine + emtricitabine/tenofovir disoproxil	€5,074.70

Costs after deduction of statutory rebates (LAUER-TAXE®) as last revised: 15 June 2019)

Costs for additionally required SHI services: not applicable

b) <u>Therapy experienced adult HIV-1 patients in whom the HI viruses have no mutations</u> known to be associated with resistance to the NNRTI class of substances, lamivudine, or tenofovir

Designation of the therapy	Annual treatment costs/patient				
Medicinal product to be assessed:					
Doravirine/lamivudine/tenofovir disoproxil	€9,505.57				
Appropriate comparator therapy:					
Individual anti-retroviral therapy <sup>2</sup>	€2.079.39–19,773.27				
Costs after deduction of statutory rebates (LAUER-TAXE®) as last revised: 15 June 2019)					
Costs for additionally required SHI convision not applicable
