Nonacog beta pegol (new therapeutic indication: haemophilia B, < 12 years)

Resolution of: 15 February 2024 Entry into force on: 15 February 2024 Federal Gazette, BAnz AT 18.03.2024 B3

New therapeutic indication (according to the marketing authorisation of 4 August 2023):

Treatment and prophylaxis of bleeding in patients with haemophilia B (congenital factor IX deficiency). Refixia can be used with all age groups.

Therapeutic indication of the resolution (resolution of 15 February 2024):

Treatment and prophylaxis of bleeding in patients with haemophilia B (congenital factor IX deficiency) aged < 12 years.

1. Additional benefit of the medicinal product in relation to the appropriate comparator therapy

Patients aged < 12 years with haemophilia B

Appropriate comparator therapy for nonacog beta pegol:

recombinant or coagulation factor IX preparations derived from human blood plasma

Extent and probability of the additional benefit of nonacog beta pegol compared to the appropriate comparator therapy:

An additional benefit is not proven.

Study results according to endpoints:1

Patients aged < 12 years with haemophilia B

No suitable data versus the appropriate comparator therapy were presented.

Summary of results for relevant clinical endpoints

| Endpoint category | Direction of effect/ risk of bias | Summary | |
|---------------------------|--------------------------------------|-------------------------------|--|
| Mortality | n.a. | There are no assessable data. | |
| Morbidity | n.a. | There are no assessable data. | |
| Health-related quality of | n.a. | There are no assessable data. | |
| life | | | |
| Side effects | n.a. | There are no assessable data. | |

Explanations:

↑: statistically significant and relevant positive effect with low/unclear reliability of data

↓: statistically significant and relevant negative effect with low/unclear reliability of data

个个: statistically significant and relevant positive effect with high reliability of data

 $\downarrow \downarrow$: statistically significant and relevant negative effect with high reliability of data

 \varnothing : No data available.

n.a.: not assessable

2. Number of patients or demarcation of patient groups eligible for treatment

Patients aged < 12 years with haemophilia B

approx. 100 - 110 patients

3. Requirements for a quality-assured application

The requirements in the product information are to be taken into account. The European Medicines Agency (EMA) provides the contents of the product information (summary of product characteristics, SmPC) for Refixia (active ingredient: nonacog beta pegol) at the following publicly accessible link (last access: 6 February 2024):

https://www.ema.europa.eu/en/documents/all-authorised-presentations/refixia-epar-all-authorised-presentations en.pdf

Treatment with nonacog beta pegol should only be initiated and monitored by doctors experienced in treating patients with haemophilia B.

¹ Data from the dossier evaluation of the Institute for Quality and Efficiency in Health Care (IQWiG) (A23-90) unless otherwise indicated.

4. Treatment costs

Annual treatment costs:

Patients aged < 12 years with haemophilia B

| Designation of the therapy | Annual treatment costs/ patient | | | |
|--|---------------------------------|-----------------------------|--|--|
| Medicinal product to be assessed: | | | | |
| Nonacog beta pegol | | | | |
| | 6 to < 12 years | € 93,104.78 - € 183,309.16 | | |
| | 0 to < 6 years | € 47,095.27 - € 93,104.78 | | |
| Appropriate comparator therapy: | | | | |
| recombinant blood coagulation factor | IX preparations | | | |
| Albutrepenonacog alfa | | | | |
| | 6 to < 12 years | € 87,986.48 - € 195,540.68 | | |
| | 0 to < 6 years | € 44,450.68 - € 110,454.08 | | |
| Eftrenonacog alfa | | | | |
| | 6 to < 12 years | € 121,064.25 - € 263,353.00 | | |
| | 0 to < 6 years | € 48,735.38 - € 145,188.63 | | |
| Nonacog alfa | | | | |
| | 6 to < 12 years | € 96,053.08 - € 225,482.11 | | |
| | 0 to < 6 years | € 48,452.00 - € 128,035.70 | | |
| Nonacog gamma | | | | |
| | 6 to < 12 years | € 93,645.50 - € 428,824.55 | | |
| | 0 to < 6 years | € 47,246.84 - € 219,860.79 | | |
| Blood coagulation factor IX preparations derived from human blood plasma | | | | |
| Human plasma-derived preparations ² | 6 to < 12 years | € 39,831.45 - € 210,115.05 | | |

Costs after deduction of statutory rebates (LAUER-TAXE®) as last revised: 15 January 2024)

Costs for additionally required SHI services: not applicable

5. Designation of medicinal products with new active ingredients according to Section 35a, paragraph 3, sentence 4 SGB V that can be used in a combination therapy with the assessed medicinal product

In the context of the designation of medicinal products with new active ingredients pursuant to Section 35a, paragraph 3, sentence 4 SGB V, the following findings are made:

 $^{^2}$ Cost representation based on the requirements in the product information for AlphaNine Other proprietary medicinal products are available.

Patients aged < 12 years with haemophilia B

 No medicinal product with new active ingredients that can be used in a combination therapy and fulfils the requirements of Section 35a, paragraph 3, sentence 4 SGB V.

The designation of combinations exclusively serves the implementation of the combination discount according to Section 130e SGB V between health insurance funds and pharmaceutical companies. The findings made neither restrict the scope of treatment required to fulfil the medical treatment mandate, nor do they make statements about expediency or economic feasibility.
