Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

ISS stage per IXRS	1 or 2	126	0 (0.0)	NE [NE, NE)	250	6 (2.4)	NE [NE, NE)	1.0000	>999.999 (<.001, NE)	0.1259
	3	27	0 (0.0)	NE [NE, NE)	58	1 (1.7)	NE [NE, NE)		>999.999 (<.001, NE)	0.5040
Prior proteasome inhibitor exposure per IXRS	Yes	138	0 (0.0)	NE [NE, NE)	276	6 (2.2)	NE [NE, NE)	1.0000	>999.999 (<.001, NE)	0.1195
	No	15	0 (0.0)	NE [NE, NE)	32	1 (3.1)	NE [NE, NE)		>999.999 (<.001, NE)	0.5541

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

		Kd (N = 153)			KdD (N = 308)			p-value[a]	Hazard Ratio	
EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior Lenalidomide exposure	Yes	74	1 (1.4)	NE [NE, NE)	122	3 (2.5)	NE [NE, NE)	0.8753	1.563 (0.161, 15.154)	0.6975
	No	79	1 (1.3)	NE [NE, NE)	186	5 (2.7)	NE [NE, NE)		1.822 (0.213, 15.608)	0.5785
Refractory to Lenalidomide	Yes	55	1 (1.8)	NE [NE, NE)	98	1 (1.0)	NE [NE, NE)	0.2826	0.371 (0.023, 6.085)	0.4698
	No	98	1 (1.0)	NE [NE, NE)	210	7 (3.3)	NE [NE, NE)		2.904 (0.357, 23.622)	0.2962

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Prior Lenalidomide exposure	Yes	74	1 (1.4)	NE [NE, NE)	122	3 (2.5)	NE [NE, NE)	0.9833	1.228 (0.123, 12.237)	0.8606
	No	79	1 (1.3)	NE [NE, NE)	186	4 (2.2)	NE [NE, NE)		1.532 (0.171, 13.724)	0.7004
Refractory to Lenalidomide	Yes	55	1 (1.8)	NE [NE, NE)	98	1 (1.0)	NE [NE, NE)	0.3227	0.345 (0.020, 5.909)	0.4445
	No	98	1 (1.0)	NE [NE, NE)	210	6 (2.9)	NE [NE, NE)		2.440 (0.293, 20.331)	0.3944

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Age - at baseline (years)	<= 75	135	3 (2.2)	NE [NE, NE)	283	12 (4.2)	NE [NE, NE)	0.5732	1.385 (0.388, 4.937)	0.6139
	> 75	18	1 (5.6)	NE [NE, NE)	25	1 (4.0)	NE [NE, NE)		0.546 (0.033, 8.909)	0.6665
Sex	Male	91	2 (2.2)	NE [NE, NE)	174	10 (5.7)	NE [NE, NE)	0.3209	1.800 (0.390, 8.294)	0.4447
	Female	62	2 (3.2)	NE [NE, NE)	134	3 (2.2)	NE [NE, NE)		0.590 (0.098, 3.544)	0.5601

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

	2	7	0 (0.0)	NE [NE, NE)	13	0 (0.0)	NE [NE, NE)		NE (NE, NE)	NE

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Age - at baseline (years)	<= 75	135	20 (14.8)	NE [NE, NE)	283	79 (27.9)	NE [NE, NE)	0.7111	1.577 (0.964, 2.578)	0.0672
	> 75	18	3 (16.7)	NE [21.5, NE)	25	9 (36.0)	NE [4.2, NE)		2.094 (0.566, 7.741)	0.2572
Sex	Male	91	16 (17.6)	NE [NE, NE)	174	54 (31.0)	NE [NE, NE)	0.5103	1.445 (0.826, 2.530)	0.1946
	Female	62	7 (11.3)	NE [NE, NE)	134	34 (25.4)	NE [NE, NE)		2.008 (0.889, 4.535)	0.0868

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.512. Cox Regression of Serious Adverse Events of Interest for Carfilzomib <Safety Population>

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
	Europe	102	0 (0.0)	NE [NE, NE)	203	2 (1.0)	NE [NE, NE)		>999.999 (<.001, NE)	0.3549
	Asia Pacific	39	0 (0.0)	NE [NE, NE)	84	1 (1.2)	NE [NE, NE)		>999.999 (<.001, NE)	0.6136
Baseline ECOG PS	0-1	146	0 (0.0)	NE [NE, NE)	294	4 (1.4)	NE [NE, NE)	0.9996	>999.999 (<.001, NE)	0.2196
	2	7	0 (0.0)	NE [NE, NE)	13	0 (0.0)	NE [NE, NE)		NE (NE, NE)	NE

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior Lenalidomide exposure	Yes	74	2 (2.7)	NE [NE, NE)	122	1 (0.8)	NE [NE, NE)	0.9941	0.274 (0.025, 3.022)	0.2575
	No	79	0 (0.0)	NE [NE, NE)	186	1 (0.5)	NE [NE, NE)		>999.999 (<.001, NE)	0.5135
Refractory to Lenalidomide	Yes	55	1 (1.8)	NE [NE, NE)	98	1 (1.0)	NE [NE, NE)	0.9353	0.513 (0.032, 8.203)	0.6307
	No	98	1 (1.0)	NE [NE, NE)	210	1 (0.5)	NE [NE, NE)		0.462 (0.029, 7.382)	0.5753

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
	Europe	102	8 (7.8)	NE [NE, NE)	203	22 (10.8)	NE [NE, NE)		1.224 (0.544, 2.751)	0.6246
	Asia Pacific	39	7 (17.9)	NE [19.8, NE)	84	17 (20.2)	NE [NE, NE)		0.964 (0.398, 2.337)	0.9356
Baseline ECOG PS	0-1	146	19 (13.0)	NE [NE, NE)	294	43 (14.6)	NE [NE, NE)	0.9844	0.991 (0.577, 1.703)	0.9750
	2	7	0 (0.0)	NE [NE, NE)	13	3 (23.1)	NE [8.2, NE)		>999.999 (<.001, NE)	0.4631

Includes subjects with at least one adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
ISS stage per IXRS	1 or 2	126	5 (4.0)	NE [NE, NE)	250	27 (10.8)	NE [NE, NE)	0.3118	2.528 (0.973, 6.569)	0.0485
	3	27	1 (3.7)	NE [NE, NE)	58	2 (3.4)	NE [NE, NE)		0.599 (0.053, 6.786)	0.6755
Prior proteasome inhibitor exposure per IXRS	Yes	138	6 (4.3)	NE [NE, NE)	276	28 (10.1)	NE [NE, NE)	0.9911	2.109 (0.872, 5.097)	0.0900
	No	15	0 (0.0)	NE [NE, NE)	32	1 (3.1)	NE [NE, NE)		>999.999 (<.001, NE)	0.5637

Includes subjects with at least one adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Prior proteasome inhibitor exposure per IXRS	Yes	138	0 (0.0)	NE [NE, NE)	276	4 (1.4)	NE [NE, NE)	0.9989	>999.999 (<.001, NE)	0.1558
	No	15	0 (0.0)	NE [NE, NE)	32	0 (0.0)	NE [NE, NE)		NE (NE, NE)	NE

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one adverse event excluding disease progression events. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
Disease progression events were defined as preferred terms of plasma cell myeloma and plasmacytoma.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event excluding disease progression events. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
Disease progression events were defined as preferred terms of plasma cell myeloma and plasmacytoma.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.518. Cox Regression of Serious Adverse Events Excluding Disease Progression Events <Safety Population>

		Kd (N = 153)			KdD (N = 308)			p-value[a]	Hazard Ratio	
Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Refractory to Bortezomib or Ixazomib	Yes	55	26 (47.3)	13.2 [5.3, 28.7)	99	61 (61.6)	11.2 [4.6, 17.2)	0.8902	1.181 (0.744, 1.875)	0.4808
	No	98	49 (50.0)	16.2 [5.8, NE)	209	131 (62.7)	10.3 [8.2, 16.7)		1.153 (0.830, 1.602)	0.3908
Prior Lenalidomide exposure	Yes	74	35 (47.3)	16.2 [5.3, NE)	122	81 (66.4)	9.8 [6.3, 15.8)	0.7220	1.246 (0.837, 1.855)	0.2766

Includes subjects with at least one serious adverse event excluding disease progression events. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
Disease progression events were defined as preferred terms of plasma cell myeloma and plasmacytoma.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.
