Post-hoc Analysen zum ersten Datenschnitt vom 14.07.2019 für den Anhang 4-G

Table 14-4.1.501. Cox Regression of Overall Survival
<Intent-to-Treat Population>

		Kd (N = 154)			KdD (N = 312)			p-value[a]	Hazard Ratio	
Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
All randomized subjects		154	36 (23.4)	NE [NE, NE)	312	59 (18.9)	NE [NE, NE)		0.745 (0.491, 1.131)	0.1672
Age - at baseline (years)	<= 75	136	33 (24.3)	NE [NE, NE)	287	53 (18.5)	NE [NE, NE)	0.3410	0.729 (0.472, 1.126)	0.1529
	> 75	18	3 (16.7)	NE [NE, NE)	25	6 (24.0)	NE [18.8, NE)		1.415 (0.351, 5.707)	0.6236

CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Stratified analysis was conducted for all randomized subjects, and unstratified analysis was conducted for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the stratified or unstratified log-rank test as specified.

Includes subjects with at least one CTCAE Grade ≥3 adverse event. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one adverse event excluding disease progression events. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
Disease progression events were defined as preferred terms of plasma cell myeloma and plasmacytoma.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Number of prior lines of therapy per IXRS	>= 2	87	64 (73.6)	2.3 [1.4, 3.5)	177	144 (81.4)	1.3 [0.8, 2.3)		1.208 (0.899, 1.622)	0.2148

Includes subjects with at least one CTCAE Grade ≥3 adverse event excluding disease progression events. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
Disease progression events were defined as preferred terms of plasma cell myeloma and plasmacytoma.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event excluding disease progression events. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
Disease progression events were defined as preferred terms of plasma cell myeloma and plasmacytoma.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.504. Cox Regression of Adverse Events of Interest for Carfilzomib
<Safety Population>

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd No. of Events (%)	Kd Median (months) (95%CI)	KdD (N = 308) N	KdD No. of Events (%)	KdD Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior Bortezomib or Ixazomib exposure	Yes	136	13 (9.6)	NE [NE, NE)	285	20 (7.0)	NE [NE, NE)	0.9943	0.615 (0.305, 1.239)	0.1697
	No	17	3 (17.6)	NE [7.3, NE)	23	3 (13.0)	NE [NE, NE)		0.663 (0.133, 3.305)	0.6133
Refractory to Bortezomib or Ixazomib	Yes	55	5 (9.1)	NE [NE, NE)	99	6 (6.1)	NE [NE, NE)	0.9519	0.577 (0.175, 1.902)	0.3601
	No	98	11 (11.2)	NE [NE, NE)	209	17 (8.1)	NE [NE, NE)		0.611 (0.286, 1.306)	0.1993

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

		Kd (N = 153)			KdD (N = 308)			p-value[a]	Hazard Ratio	
EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior IMiD exposure	Yes	110	2 (1.8)	NE [NE, NE)	205	4 (2.0)	NE [NE, NE)	0.9918	0.863 (0.158, 4.714)	0.8644
	No	43	2 (4.7)	NE [NE, NE)	103	0 (0.0)	NE [NE, NE)		<.001 (<.001, NE)	0.0186
Refractory to IMiD	Yes	65	2 (3.1)	NE [NE, NE)	129	1 (0.8)	NE [NE, NE)	0.4268	0.210 (0.019, 2.316)	0.1592
	No	88	2 (2.3)	NE [NE, NE)	179	3 (1.7)	NE [NE, NE)		0.619 (0.103, 3.709)	0.5964

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

	Female	62	20 (32.3)	NE [10.2, NE)	134	53 (39.6)	NE [16.6, NE)		1.288 (0.770, 2.154)	0.3378

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

<Safety Population>

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior IMiD exposure	Yes	110	15 (13.6)	NE [NE, NE)	205	28 (13.7)	NE [NE, NE)	0.2292	0.886 (0.473, 1.662)	0.7057
	No	43	3 (7.0)	NE [NE, NE)	103	16 (15.5)	NE [NE, NE)		1.982 (0.577, 6.809)	0.2679
Refractory to IMiD	Yes	65	8 (12.3)	NE [NE, NE)	129	18 (14.0)	NE [NE, NE)	0.6798	0.936 (0.405, 2.164)	0.8771
	No	88	10 (11.4)	NE [NE, NE)	179	26 (14.5)	NE [NE, NE)		1.172 (0.565, 2.432)	0.6690

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

		Kd (N = 153)			KdD (N = 308)			p-value[a]	Hazard Ratio	
EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Number of prior lines of therapy per IXRS	1	66	2 (3.0)	NE [NE, NE)	131	1 (0.8)	NE [NE, NE)	0.5365	0.238 (0.022, 2.627)	0.2025
	>= 2	87	4 (4.6)	NE [NE, NE)	177	5 (2.8)	NE [NE, NE)		0.560 (0.150, 2.091)	0.3824

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

	Other or Unknown	11	3 (27.3)	NE [1.2, NE)	22	10 (45.5)	15.9 [9.0, NE)		1.416 (0.387, 5.175)	0.6052
Region	North America	12	5 (41.7)	11.5 [0.3, NE)	21	8 (38.1)	NE [8.1, NE)	0.4303	0.673 (0.213, 2.125)	0.4969

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Prior Lenalidomide exposure	Yes	74	0 (0.0)	NE [NE, NE)	122	14 (11.5)	NE [NE, NE)	0.9867	>999.999 (<.001, NE)	0.0026
	No	79	1 (1.3)	NE [NE, NE)	186	25 (13.4)	NE [NE, NE)		11.300 (1.531, 83.397)	0.0024
Refractory to Lenalidomide	Yes	55	0 (0.0)	NE [NE, NE)	98	7 (7.1)	NE [NE, NE)	0.9896	>999.999 (<.001, NE)	0.0431
	No	98	1 (1.0)	NE [NE, NE)	210	32 (15.2)	NE [NE, NE)		16.078 (2.197, 117.661)	0.0002

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.504. Cox Regression of Adverse Events of Interest for Carfilzomib <Safety Population>

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior Lenalidomide exposure	Yes	74	5 (6.8)	NE [NE, NE)	122	19 (15.6)	NE [NE, NE)	0.7672	2.062 (0.769, 5.532)	0.1415
	No	79	8 (10.1)	NE [NE, NE)	186	34 (18.3)	NE [NE, NE)		1.710 (0.791, 3.697)	0.1681
Refractory to Lenalidomide	Yes	55	2 (3.6)	NE [NE, NE)	98	16 (16.3)	NE [NE, NE)	0.2126	4.160 (0.956, 18.110)	0.0389
	No	98	11 (11.2)	NE [NE, NE)	210	37 (17.6)	NE [NE, NE)		1.458 (0.743, 2.860)	0.2709

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Total subjects		153	84 (54.9)	7.6 [4.3, 11.6)	308	225 (73.1)	5.1 [3.9, 6.5)		1.324 (1.030, 1.701)	0.0280

Includes subjects with at least one adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

		Kd (N = 153)			KdD (N = 308)			p-value[a]	Hazard Ratio	
EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior IMiD exposure	Yes	110	3 (2.7)	NE [NE, NE)	205	12 (5.9)	NE [NE, NE)	0.9882	1.997 (0.563, 7.083)	0.2747
	No	43	1 (2.3)	NE [NE, NE)	103	0 (0.0)	NE [NE, NE)		<.001 (<.001, NE)	0.1186
Refractory to IMiD	Yes	65	1 (1.5)	NE [NE, NE)	129	7 (5.4)	NE [NE, NE)	0.2672	3.198 (0.393, 26.059)	0.2509
	No	88	3 (3.4)	NE [NE, NE)	179	5 (2.8)	NE [NE, NE)		0.777 (0.186, 3.253)	0.7290

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Age - at baseline (years)	<= 75	135	14 (10.4)	NE [NE, NE)	283	45 (15.9)	NE [NE, NE)	0.1031	1.485 (0.814, 2.707)	0.1944
	> 75	18	4 (22.2)	NE [12.1, NE)	25	2 (8.0)	NE [NE, NE)		0.338 (0.062, 1.853)	0.1851
Sex	Male	91	9 (9.9)	NE [NE, NE)	174	26 (14.9)	NE [NE, NE)	0.5901	1.448 (0.678, 3.094)	0.3360
	Female	62	9 (14.5)	NE [NE, NE)	134	21 (15.7)	NE [NE, NE)		1.050 (0.481, 2.295)	0.9036

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Prior Lenalidomide exposure	Yes	74	1 (1.4)	NE [NE, NE)	122	4 (3.3)	NE [NE, NE)	0.3861	2.089 (0.233, 18.740)	0.5008
	No	79	3 (3.8)	NE [NE, NE)	186	5 (2.7)	NE [NE, NE)		0.588 (0.140, 2.468)	0.4634
Refractory to Lenalidomide	Yes	55	1 (1.8)	NE [NE, NE)	98	3 (3.1)	NE [NE, NE)	0.7419	1.312 (0.136, 12.653)	0.8136
	No	98	3 (3.1)	NE [NE, NE)	210	6 (2.9)	NE [NE, NE)		0.798 (0.199, 3.200)	0.7495

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.506. Cox Regression of Serious Adverse Events of Interest for Carfilzomib <Safety Population>

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd No. of Events (%)	Kd Median (months) (95%CI)	KdD (N = 308) N	KdD No. of Events (%)	KdD Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior Bortezomib or Ixazomib exposure	Yes	136	1 (0.7)	NE [NE, NE)	285	5 (1.8)	NE [NE, NE)	0.5116	2.133 (0.249, 18.296)	0.4795
	No	17	1 (5.9)	NE [17.3, NE)	23	1 (4.3)	NE [NE, NE)		0.586 (0.036, 9.621)	0.7051
Refractory to Bortezomib or Ixazomib	Yes	55	1 (1.8)	NE [NE, NE)	99	1 (1.0)	NE [NE, NE)	0.4276	0.466 (0.029, 7.501)	0.5811
	No	98	1 (1.0)	NE [NE, NE)	209	5 (2.4)	NE [NE, NE)		2.017 (0.234, 17.362)	0.5147

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior IMiD exposure	Yes	110	0 (0.0)	NE [NE, NE)	205	2 (1.0)	NE [NE, NE)	0.9989	>999.999 (<.001, NE)	0.2995
	No	43	0 (0.0)	NE [NE, NE)	103	0 (0.0)	NE [NE, NE)		NE (NE, NE)	NE
Refractory to IMiD	Yes	65	0 (0.0)	NE [NE, NE)	129	0 (0.0)	NE [NE, NE)	0.9989	NE (NE, NE)	NE
	No	88	0 (0.0)	NE [NE, NE)	179	2 (1.1)	NE [NE, NE)		>999.999 (<.001, NE)	0.3205

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

EOI Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Prior Bortezomib or Ixazomib exposure	Yes	136	1 (0.7)	NE [NE, NE)	285	4 (1.4)	NE [NE, NE)	1.0000	1.360 (0.151, 12.220)	0.7829
	No	17	0 (0.0)	NE [NE, NE)	23	0 (0.0)	NE [NE, NE)		NE (NE, NE)	NE
Refractory to Bortezomib or Ixazomib	Yes	55	1 (1.8)	NE [NE, NE)	99	0 (0.0)	NE [NE, NE)	0.9949	<.001 (<.001, NE)	0.1103
	No	98	0 (0.0)	NE [NE, NE)	209	4 (1.9)	NE [NE, NE)		>999.999 (<.001, NE)	0.2544

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of Interest for Carfilzomib. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

		Kd (N = 153)			KdD (N = 308)			p-value[a]	Hazard Ratio	
EOI Characteristics	Subgroup	N	No. of Events (%)	Median (months) (95%CI)	N	No. of Events (%)	Median (months) (95%CI)	Interaction with Treatment	(KdD/Kd) (95%CI)	p-value (2-sided)[b]
Number of prior lines of therapy per IXRS	1	66	0 (0.0)	NE [NE, NE)	131	20 (15.3)	NE [NE, NE)	0.9998	>999.999 (<.001, NE)	0.0008
	>= 2	87	0 (0.0)	NE [NE, NE)	177	18 (10.2)	NE [NE, NE)		>999.999 (<.001, NE)	0.0021

Includes subjects with at least one adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one CTCAE Grade ≥3 adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes subjects with at least one serious adverse event of interest for Daratumumab. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Unstratified analysis was conducted for total subjects and subgroups.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.514. Cox Regression of Most Frequent Adverse Events by MedDRA SOC and PT
<Safety Population>

SOC PT Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Leukopenia										
Total subjects		153	6 (3.9)	NE [NE, NE)	308	20 (6.5)	NE [NE, NE)		1.636 (0.657, 4.076)	0.2852
Cardiac disorders										

Includes PT where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant (p <0.05) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Refractory to IMiD	Yes	65	11 (16.9)	NE [16.8, NE)	129	44 (34.1)	NE [16.2, NE)	0.6931	1.931 (0.996, 3.743)	0.0471

Includes PT where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant (p <0.05) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

SOC PT Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
	Other or Unknown	11	0 (0.0)	NE [NE, NE)	22	3 (13.6)	NE [NE, NE)		>999.999 (<.001, NE)	0.2059
Region	North America	12	2 (16.7)	NE [8.5, NE)	21	2 (9.5)	NE [NE, NE)	0.3676	0.519 (0.072, 3.725)	0.5062
	Europe	102	0 (0.0)	NE [NE, NE)	203	13 (6.4)	NE [NE, NE)		>999.999 (<.001, NE)	0.0093

Includes PT where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant (p <0.05) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes PT where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant (p <0.05) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

SOC PT Characteristics	Subgroup	Kd (N = 153) N	Kd (N = 153) No. of Events (%)	Kd (N = 153) Median (months) (95%CI)	KdD (N = 308) N	KdD (N = 308) No. of Events (%)	KdD (N = 308) Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Race	White	122	1 (0.8)	NE [NE, NE)	240	11 (4.6)	NE [NE, NE)	0.9330	5.165 (0.666, 40.072)	0.0797
	Asian	20	1 (5.0)	NE [NE, NE)	46	7 (15.2)	NE [NE, NE)		3.015 (0.371, 24.507)	0.2777
	Other or Unknown	11	0 (0.0)	NE [NE, NE)	22	2 (9.1)	NE [NE, NE)		>999.999 (<.001, NE)	0.4259

Includes PT where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Respiratory, thoracic and mediastinal disorders										
Dyspnoea										

Includes PT where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant (p <0.05) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes SOC where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Includes SOC where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Prior Bortezomib or Ixazomib exposure	Yes	136	1 (0.7)	NE [NE, NE)	285	17 (6.0)	NE [NE, NE)	0.9935	7.379 (0.982, 55.451)	0.0225
	No	17	0 (0.0)	NE [NE, NE)	23	1 (4.3)	NE [NE, NE)		>999.999 (<.001, NE)	0.5050

Includes SOC where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Table 14-6.1.513. Cox Regression of Most Frequent Adverse Events by MedDRA SOC
<Safety Population>

SOC Characteristics	Subgroup	Kd (N = 153) N	Kd No. of Events (%)	Kd Median (months) (95%CI)	KdD (N = 308) N	KdD No. of Events (%)	KdD Median (months) (95%CI)	p-value[a] Interaction with Treatment	Hazard Ratio (KdD/Kd) (95%CI)	p-value (2-sided)[b]
Total subjects		153	70 (45.8)	12.9 [6.1, NE)	308	150 (48.7)	13.0 [9.1, NE)		1.041 (0.784, 1.383)	0.7897
Skin and subcutaneous tissue disorders										
Total subjects		153	28 (18.3)	NE [NE, NE)	308	70 (22.7)	NE [20.5, NE)		1.105 (0.712, 1.715)	0.6607

Includes SOC where at least 10 subjects with at least one adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

Total subjects		153	11 (7.2)	NE [NE, NE)	308	21 (6.8)	NE [NE, NE)		0.934 (0.450, 1.939)	0.8527

Includes PT where at least 5% subjects with at least one Grade ≥3 adverse event in one treatment arm. If a subject has no event, the censoring is as follows: earliest between withdrawal of consent date, lost to follow-up date, study treatment end date + 30 days, cut-off date and death date.
CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.

CI: confidence interval; NE: not estimable; ECOG PS: Eastern Cooperative Oncology Group Performance Status; Kd: carfilzomib and dexamethasone; KdD: carfilzomib, dexamethasone, and daratumumab.
Unstratified analysis was conducted for total subjects and for subgroups.
Subgroup analyses are provided only if the respective SOC or SOC/PT event is statistically significant ($p < 0.05$) for the total population.
[a] The p-value (2-sided) for interaction was from a Cox regression model with baseline characteristic, treatment group and interaction term between baseline characteristic and treatment as covariates.
[b] 2-sided p-values were calculated using the unstratified log-rank test.
