 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

35 - <50	0/162	1/132 (<1%)	<0.0001 (<0.0001, -) />0.999	-2.9887 (-19.3486, 13.3712) /0.720	<0.0001 (<0.0001, -) />0.999	
>=50	0/ 66	0/ 96	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

>=50	0/ 66	0/ 96	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD,
 OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively),
 using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models
 with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical
 estimates.

35 - <50	7/162 (4%)	2/132 (2%)	2.9355 (0.5994, 14.3756) /0.184	2.8058 (-0.9553, 6.5670) /0.144	2.8519 (0.6025, 13.4980) /0.186	
>=50	0/ 66	3/ 96 (3%)	<0.0001 (<0.0001, -) />0.999	-5.3701 (-30.1817, 19.4415) /0.671	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Chlamydial infection						
Female	0/ 99	0/104	NC	NC	NC	>0.999
Male	5/209 (2%)	2/204 (<1%)	2.4755 (0.4748, 12.9069) /0.282	1.4120 (-1.0619, 3.8858) /0.263	2.4402 (0.4789, 12.4350) /0.283	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Sex at Birth - ATLAS

Maximum Toxicity Grade= 1

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Anal chlamydia infection Female	0/ 99	0/104	NC	NC	NC	NC
Male	1/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Anal infection Female	0/ 99	0/104	NC	NC	NC	NC
Male	1/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Injection site reaction						
Female	1/ 99 (1%)	0/104	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	>0.999
Male	2/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Cyst						
Female	0/ 99	0/104	NC	NC	NC	>0.999
Male	1/209 (<1%)	1/204 (<1%)	0.9760 (0.0606, 15.7087) /0.986	-0.0117 (-1.3510, 1.3276) /0.986	0.9761 (0.0615, 15.5005) /0.986	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Male	0/209	2/204 (<1%)	<0.0001 (<0.0001, -) />0.999	NC	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Male	1/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Palpitations						
Female	0/ 99	0/104	NC	NC	NC	NC
Male	1/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Sinus tachycardia						
Female	0/ 99	1/104 (<1%)	<0.0001 (<0.0001, -) />0.999	-3.2169 (-23.8013, 17.3675) /0.759	<0.0001 (<0.0001, -) />0.999	NC
Male	0/209	0/204	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Sex at Birth - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Respiratory tract infection viral						
Female	0/ 99	3/104 (3%)	<0.0001 (<0.0001, -) />0.999	-5.1377 (-25.6021, 15.3266) /0.623	<0.0001 (<0.0001, -) />0.999	0.015
Male	4/209 (2%)	1/204 (<1%)	3.9610 (0.4389, 35.7437) /0.220	1.4237 (-0.6665, 3.5139) /0.182	3.9043 (0.4401, 34.6355) /0.221	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Male	1/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD,
 OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively),
 using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models
 with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical
 estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Sex at Birth - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Joint dislocation						
Female	0/ 99	0/104	NC	NC	NC	NC
Male	1/209 (<1%)	0/204	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Ligament rupture						
Female	0/ 99	0/104	NC	NC	NC	NC
Male	0/209	1/204 (<1%)	<0.0001 (<0.0001, -) />0.999	NC	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Hypertension Female	2/ 99 (2%)	1/104 (<1%)	2.1237 (0.1895, 23.7976) /0.541	1.0587 (-2.2877, 4.4050) /0.535	2.1010 (0.1936, 22.8065) /0.542	0.966
Male	2/209 (<1%)	1/204 (<1%)	1.9614 (0.1765, 21.7994) /0.584	0.4667 (-1.1644, 2.0979) /0.575	1.9522 (0.1784, 21.3622) /0.584	
Deep vein thrombosis Female	0/ 99	1/104 (<1%)	<0.0001 (<0.0001, -) />0.999	-3.2169 (-23.8013, 17.3675) /0.759	<0.0001 (<0.0001, -) />0.999	NC
Male	0/209	0/204	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Investigations						
Any Event						
Female	0/ 99	3/104 (3%)	<0.0001 (<0.0001, -) />0.999	-5.1377 (-25.6021, 15.3266) /0.623	<0.0001 (<0.0001, -) />0.999	0.010
Male	7/209 (3%)	2/204 (<1%)	3.5000 (0.7184, 17.0523) /0.121	2.3689 (-0.4200, 5.1578) /0.096	3.4163 (0.7182, 16.2506) /0.123	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.19

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Sex at Birth - ATLAS

Maximum Toxicity Grade= 4

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Investigations						
Any Event						
Female	1/ 99 (1%)	0/104	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	0.513
Male	4/209 (2%)	1/204 (<1%)	3.9610 (0.4389, 35.7437) /0.220	1.4237 (-0.6665, 3.5139) /0.182	3.9043 (0.4401, 34.6355) /0.221	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Race - ATLAS

Maximum Toxicity Grade= 1

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Infection parasitic						
White	0/214	1/207 (<1%)	<0.0001 (<0.0001, -) />0.999	NC	<0.0001 (<0.0001, -) />0.999	NC
Non-White	0/ 94	0/101	NC	NC	NC	
Injection site cellulitis						
White	0/214	0/207	NC	NC	NC	NC
Non-White	1/ 94 (1%)	0/101	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Tongue ulceration						
White	0/214	0/207	NC	NC	NC	NC
Non-White	0/ 94	1/101 (<1%)	<0.0001 (<0.0001, -) />0.999	-3.2478 (-24.3448, 17.8492) /0.763	<0.0001 (<0.0001, -) />0.999	
Tooth impacted						
White	1/214 (<1%)	0/207	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	NC
Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Non-White	1/ 94 (1%)	0/101	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Race - ATLAS

Maximum Toxicity Grade= 1

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Weight decreased						
White	0/214	1/207 (<1%)	<0.0001 (<0.0001, -) />0.999	NC	<0.0001 (<0.0001, -) />0.999	NC
Non-White	0/ 94	0/101	NC	NC	NC	
Weight increased						
White	1/214 (<1%)	0/207	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	NC
Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Biliary tract disorder						
White	0/214	0/207	NC	NC	NC	NC
Non-White	1/ 94 (1%)	0/101	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
<hr/>						
Urethritis						
White	1/214 (<1%)	0/207	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	0.102
Non-White	0/ 94	1/101 (<1%)	<0.0001 (<0.0001, -) />0.999	-3.2478 (-24.3448, 17.8492) /0.763	<0.0001 (<0.0001, -) />0.999	
Anal abscess						
White	0/214	0/207	NC	NC	NC	NC
Non-White	1/ 94 (1%)	0/101	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Race - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Back pain						
White	7/214 (3%)	0/207	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	0.149
Non-White	3/ 94 (3%)	1/101 (<1%)	3.2967 (0.3369, 32.2603) /0.305	2.2014 (-1.8427, 6.2455) /0.286	3.2234 (0.3412, 30.4507) /0.307	
Arthralgia						
White	0/214	0/207	NC	NC	NC	NC
Non-White	0/ 94	1/101 (<1%)	<0.0001 (<0.0001, -) />0.999	-3.2478 (-24.3448, 17.8492) /0.763	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.20

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Race - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Post-traumatic headache						
White	0/214	1/207 (<1%)	<0.0001 (<0.0001, -) />0.999	NC	<0.0001 (<0.0001, -) />0.999	NC
Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.20

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Race - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Blood and lymphatic system disorders						
Any Event						
White	0/214	2/207 (<1%)	<0.0001 (<0.0001, -) />0.999	NC	<0.0001 (<0.0001, -) />0.999	0.078
Non-White	2/ 94 (2%)	1/101 (<1%)	2.1739 (0.1939, 24.3767) /0.529	1.1376 (-2.3608, 4.6359) /0.524	2.1489 (0.1981, 23.3113) /0.529	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Race - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Drug hypersensitivity						
White	1/214 (<1%)	0/207	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	NC
Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

White	2/214 (<1%)	1/207 (<1%)	1.9434 (0.1749, 21.5967) /0.589	0.4515 (-1.1467, 2.0497) /0.580	1.9346 (0.1768, 21.1730) /0.589	>0.999
Non-White	0/ 94	0/101	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

White	0/214	0/207	NC	NC	NC	NC
Non-White	1/ 94 (1%)	0/101	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class	Q4W IM Preferred Term (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Overall						
Any Event						
North America	31/ 93 (33%)	34/107 (32%)	1.0735 (0.5934, 1.9422) /0.815	1.5576 (-11.4662, 14.5815) /0.815	1.0490 (0.7034, 1.5644) /0.814	0.486
Europe	51/145 (35%)	60/146 (41%)	0.7777 (0.4840, 1.2495) /0.299	-5.9235 (-17.0635, 5.2165) /0.297	0.8559 (0.6377, 1.1486) /0.300	
Rest of World	19/ 70 (27%)	21/ 55 (38%)	0.6032 (0.2829, 1.2862) /0.191	-11.0390 (-27.5732, 5.4953) /0.191	0.7109 (0.4268, 1.1842) /0.190	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

North America	1/ 93 (1%)	0/107	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	0.141
Europe	2/145 (1%)	5/146 (3%)	0.3944 (0.0753, 2.0665) /0.271	-2.0453 (-5.5533, 1.4626) /0.253	0.4028 (0.0794, 2.0426) /0.272	
Rest of World	1/ 70 (1%)	0/ 55	>999 (>999, >999) /NC	3.7047 (-23.6135, 31.0229) /0.790	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

North America	1/ 93 (1%)	0/107	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	NC
Europe	1/145 (<1%)	0/146	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Rest of World	0/ 70	0/ 55	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Europe	13/145 (9%)	0/146	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Rest of World	3/ 70 (4%)	0/ 55	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Region - ATLAS

Maximum Toxicity Grade= 1

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Injection site discomfort						
North America	0/ 93	0/107	NC	NC	NC	NC
Europe	1/145 (<1%)	0/146	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Rest of World	0/ 70	0/ 55	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Rest of World	0/ 70	1/ 55 (2%)	<0.0001 (<0.0001, -) />0.999	-4.0954 (-28.7415, 20.5508) /0.745	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Europe	2/145 (1%)	3/146 (2%)	0.6667 (0.1097, 4.0499) /0.660	-0.6755 (-3.6586, 2.3077) /0.657	0.6713 (0.1138, 3.9582) /0.660	
Rest of World	4/ 70 (6%)	1/ 55 (2%)	3.2727 (0.3552, 30.1518) /0.295	3.8961 (-2.5873, 10.3795) /0.239	3.1429 (0.3615, 27.3248) /0.299	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.

NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Lipase increased						
North America	0/ 93	0/107	NC	NC	NC	>0.999
Europe	1/145 (<1%)	1/146 (<1%)	1.0069 (0.0624, 16.2534) /0.996	0.0047 (-1.8938, 1.9032) /0.996	1.0069 (0.0636, 15.9449) /0.996	
Rest of World	0/ 70	0/ 55	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Immune system disorders						
Any Event						
North America	1/ 93 (1%)	1/107 (<1%)	1.1522 (0.0711, 18.6807) /0.921	0.1407 (-2.6374, 2.9188) /0.921	1.1505 (0.0730, 18.1392) /0.921	0.120
Europe	2/145 (1%)	0/146	>999 (>999, >999) /NC	NC	>999 (>999, >999) /NC	
Rest of World	0/ 70	1/ 55 (2%)	<0.0001 (<0.0001, -) />0.999	-4.0954 (-28.7415, 20.5508) /0.745	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Rest of World	0/ 70	1/ 55 (2%)	<0.0001 (<0.0001, -) />0.999	-4.0954 (-28.7415, 20.5508) /0.745	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Region - ATLAS

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q4W IM (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Proctitis herpes						
North America	0/ 93	1/107 (<1%)	<0.0001 (<0.0001, -) />0.999	-3.1875 (-24.3551, 17.9801) /0.768	<0.0001 (<0.0001, -) />0.999	NC
Europe	0/145	0/146	NC	NC	NC	
Rest of World	0/ 70	0/ 55	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Rest of World	0/ 70	0/ 55	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported, regardless of SOC's selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Maximum Toxicity Grade= 2

System Organ Class	Q4W IM Preferred Term (N=308)	Current ART (N=308)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Cough						
North America	2/ 93 (2%)	2/107 (2%)	1.1538 (0.1593, 8.3567) /0.887	0.2814 (-3.6272, 4.1900) /0.888	1.1505 (0.1653, 8.0076) /0.887	NC
Europe	0/145	0/146	NC	NC	NC	
Rest of World	0/ 70	1/ 55 (2%)	<0.0001 (<0.0001, -) />0.999	-4.0954 (-28.7415, 20.5508) /0.745	<0.0001 (<0.0001, -) />0.999	

Note: "Any Event" represents subjects with any AE reported, regardless of SOCs selected.
 Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment.
 NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.
