Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

North America	0/118	2/135 (1%)				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

North America	0/118	2/135 (1%)				
Europe	1/165 (<1%)	4/155 (3%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Flushing North America	0/118	1/135 (<1%)				
Europe	0/165	0/155				
Rest of World	1/ 44 (2%)	0/ 37				
Hot flush North America	0/118	0/135				
Europe	2/165 (1%)	0/155				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Testis discomfort						
North America	1/118 (<1%)	0/135				
Europe	0/165	0/155				
Rest of World	0/ 44	0/ 37				
Uterine polyp						
North America	0/118	0/135				
Europe	1/165 (<1%)	0/155				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Ocular hyperaemia						
North America	0/118	0/135				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				
Pterygium						
North America	0/118	0/135				
Europe	1/165 (<1%)	0/155				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Region - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Injection site swelling						
North America	6/118 (5%)	5/135 (4%)	1.3929 (0.4139, 4.6869) /0.593	1.3810 (-3.7043, 6.4663) /0.595	1.3729 (0.4300, 4.3830) /0.593	0.251
Europe	1/165 (<1%)	1/155 (<1%)	0.9390 (0.0582, 15.1440) /0.965	-0.0391 (-1.7686, 1.6904) /0.965	0.9394 (0.0593, 14.8887) /0.965	
Rest of World	3/ 44 (7%)	0/ 37	>999 (>999, >999) /NC	8.9078 (-24.6793, 42.4948) /0.603	>999 (>999, >999) /NC	

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Rhinitis allergic						
North America	1/118 (<1%)	1/135 (<1%)				
Europe	0/165	3/155 (2%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Europe	1/165 (<1%)	0/155				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

North America	0/118	1/135 (<1%)				
Europe	0/165	0/155				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Table 3.21

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Region - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Maximum Toxicity Grade= 2

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Benign prostatic hyperplasia						
North America	0/118	0/135				
Europe	1/165 (<1%)	1/155 (<1%)				
Rest of World	1/ 44 (2%)	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Cataract						
North America	1/118 (<1%)	0/135				
Europe	1/165 (<1%)	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				
Diplopia						
North America	0/118	0/135				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Table 3.21

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Region - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Maximum Toxicity Grade= 3

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Sleep apnoea syndrome						
North America	0/118	0/135				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Analysis of Proportion of Subjects with Adverse Events by Maximum Toxicity Grade, System Organ Class and Preferred Term (Maintenance Phase) - by Region - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Maximum Toxicity Grade= 3

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Renal colic						
North America	0/118	0/135				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.

Note: OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates. NC = Not Calculable.

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Age (years) (<35 vs. 35 - <50 vs. >=50)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Gastrointestinal disorders						
Any Event						
<35	0/ 84	0/ 98				
35 - <50	1/154 (<1%)	2/143 (1%)				
>=50	1/ 89 (1%)	0/ 86				
Abdominal pain						
<35	0/ 84	0/ 98				
35 - <50	0/154	1/143 (<1%)				
>=50	0/ 89	0/ 86				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Age (years) (<35 vs. 35 - <50 vs. >=50)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Tympanic membrane perforation						
<35	0/ 84	0/ 98				
35 - <50	0/154	1/143 (<1%)				
>=50	0/ 89	0/ 86				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Note: "Any Event" represents subjects with any AE reported.
 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Sex at Birth (Female vs. Male)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Acute hepatitis B						
Female	0/ 73	0/ 75				
Male	1/254 (<1%)	1/252 (<1%)				
Pneumonia

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Sex at Birth (Female vs. Male)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Immune system disorders						
Any Event						
Female	0/ 73	2/ 75 (3%)				
Male	0/254	0/252				
Drug hypersensitivity						
Female	0/ 73	1/ 75 (1%)				
Male	0/254	0/252				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Chest pain						
White	0/239	1/256 (<1%)				
Non-White	0/ 88	0/ 71				
Fatigue						
White	0/239	1/256 (<1%)				
Non-White	0/ 88	0/ 71				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Race (White vs. Non-White)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Injection site discolouration						
White	1/239 (<1%)	0/256				
Non-White	0/ 88	0/ 71				
Injection site swelling						
White	1/239 (<1%)	0/256				
Non-White	0/ 88	0/ 71				
Injection site warmth						
White	1/239 (<1%)	0/256				
Non-White	0/ 88	0/ 71				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Race (White vs. Non-White)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Neuritis cranial						
White	1/239 (<1%)	0/256				
Non-White	0/ 88	0/ 71				
Cardiac disorders						
Any Event						
White	0/239	2/256 (<1%)				
Non-White	0/ 88	0/ 71				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. North America	6/118 (5%)	10/135 (7%)	0.6696 (0.2358, 1.9017) /0.451	-2.3227 (-8.2580, 3.6127) /0.443	0.6864 (0.2572, 1.8318) /0.452	NC
Europe	4/165 (2%)	9/155 (6%)	0.4030 (0.1215, 1.3367) /0.137	-3.3822 (-7.7482, 0.9838) /0.129	0.4175 (0.1312, 1.3281) /0.139	
Rest of World	0/ 44	0/ 37	NC	NC	NC	

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Analysis of Proportion of Subjects with Severe Adverse Events (Maximum Grade 3 or 4) by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Region (North America vs. Europe vs. Rest of World)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Rotator cuff syndrome						
North America	0/118	0/135				
Europe	1/165 (<1%)	0/155				
Rest of World	0/ 44	0/ 37				

Investigations

Any Event

North America	1/118 (<1%)	0/135
Europe	1/165 (<1%)	2/155 (1%)
Rest of World	1/ 44 (2%)	0/ 37

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.22

Any Event						
North America	0/118	2/135 (1%)				
Europe	0/165	0/155				
Rest of World	0/ 44	0/ 37				
Depression						
North America	0/118	1/135 (<1%)				
Europe	0/165	0/155				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Infections and infestations						
Any Event						
<35	3/ 84 (4%)	0/ 98				
35 - <50	4/154 (3%)	5/143 (3%)				
>=50	2/ 89 (2%)	2/ 86 (2%)				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.23
 Analysis of Proportion of Subjects with Serious Adverse Events (Excluding Deaths)
 by System Organ Class and Preferred Term (Maintenance Phase)
 - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Age (years) (<35 vs. 35 - <50 vs. >=50)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Pneumonia

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter- action p-value (RR)
Overdose						
<35	0/ 84	0/ 98				
35 - <50	1/154 (<1%)	0/143				
>=50	0/ 89	0/ 86				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.23
 Analysis of Proportion of Subjects with Serious Adverse Events (Excluding Deaths)
 by System Organ Class and Preferred Term (Maintenance Phase)
 - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Sex at Birth (Female vs. Male)

 Analysis of Proportion of Subjects with Serious Adverse Events (Excluding Deaths)
 by System Organ Class and Preferred Term (Maintenance Phase)
 - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Sex at Birth (Female vs. Male)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Reproductive system and breast disorders						
Any Event						
Female	0/ 73	0/ 75				
Male	0/254	1/252 (<1%)				
Priapism						
Female	0/ 73	0/ 75				
Male	0/254	1/252 (<1%)				

Note: "Any Event" represents subjects with any AE reported.
 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.23

OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.23
 Analysis of Proportion of Subjects with Serious Adverse Events (Excluding Deaths)
 by System Organ Class and Preferred Term (Maintenance Phase)
 - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Race (White vs. Non-White)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Immune system disorders						
Any Event						
White	0/239	1/256 (<1%)				
Non-White	0/ 88	1/ 71 (1%)				
Drug hypersensitivity						
White	0/239	0/256				
Non-White	0/ 88	1/ 71 (1%)				

Note: "Any Event" represents subjects with any AE reported.
 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

System Organ Class	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter- action p-value (RR)
Musculoskeletal and connective tissue disorders						
Any Event						
North America	1/118 (<1%)	0/135				
Europe	3/165 (2%)	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. NC = Not Calculable. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.23
 Analysis of Proportion of Subjects with Serious Adverse Events (Excluding Deaths)
 by System Organ Class and Preferred Term (Maintenance Phase)
 - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Region (North America vs. Europe vs. Rest of World)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter- action p-value (RR)

Reproductive system and breast disorders						
Any Event

Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.24

Analysis of Proportion of Subjects with Adverse Events Leading to Treatment Discontinuation by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Age (years) (<35 vs. 35 - <50 vs. >=50)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Infections and infestations						
Any Event						
<35	2/ 84 (2%)	0/ 98				
35 - <50	0/154	1/143 (<1%)				
>=50	0/ 89	1/ 86 (1%)				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.24

Analysis of Proportion of Subjects with Adverse Events Leading to Treatment Discontinuation by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Sex at Birth (Female vs. Male)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Overall						
Any Event						
Female	5/ 73 (7%)	5/ 75 (7%)	1.0294 (0.2852, 3.7162) /0.965	0.1826 (-7.9071, 8.2724) /0.965	1.0274 (0.3104, 3.4008) /0.965	0.853
Male	9/254 (4%)	10/252 (4%)	0.8890 (0.3550, 2.2260) /0.802	-0.4249 (-3.7383, 2.8884) /0.802	0.8929 (0.3691, 2.1603) /0.802	

Note: "Any Event" represents subjects with any AE reported.
 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Male	0/254	1/252 (<1%)				
Osteonecrosis						
Female	0/ 73	0/ 75				
Male	1/254 (<1%)	0/252				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.24
 Analysis of Proportion of Subjects with Adverse Events Leading to Treatment Discontinuation by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Sex at Birth (Female vs. Male)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Cardiac disorders						
Any Event						
Female	0/ 73	0/ 75

Note: "Any Event" represents subjects with any AE reported.
 Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.24
 Analysis of Proportion of Subjects with Adverse Events Leading to Treatment Discontinuation by
 System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M
 (Prior CAB + RPV of 0 Weeks)

Subgroup: Race (White vs. Non-White)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)

Gastrointestinal disorders						
Any Event						
White	0/239	2/256 (<1%)				
Non-White	0/ 88	0/ 71				
Nausea						
White	0/239	2/256 (<1%)				
Non-White	0/ 88	0/ 71

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.24

Analysis of Proportion of Subjects with Adverse Events Leading to Treatment Discontinuation by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Region (North America vs. Europe vs. Rest of World)

System Organ Class Preferred Term	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter- action p-value (RR)

Hyperhidrosis						
North America	0/118	2/135 (1%)				
Europe	1/165 (<1%)	0/155				
Rest of World	0/ 44	0/ 37				
Rash maculo-papular						
North America	1/118 (<1%)	0/135				
Europe	0/165	0/155				
Rest of World	0/ 44	0/ 37

North America	0/118	0/135				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group. OR = Odds Ratio; RD = Risk Difference (in percentages); RR = Relative Risk. For each SOC and PT, RD, OR and RR for each subgroup are obtained from genmod models (link = identity, logit or log, respectively), using a 'by subgroup statement'. P-value for interaction is for RR only and is obtained by genmod models with the following variables: treatment, subgroup, subgroup*treatment with no covariate adjustment. Zero counts for AEs in either treatment group may lead to unreliable statistical estimates.

Table 3.24
 Analysis of Proportion of Subjects with Adverse Events Leading to Treatment Discontinuation by System Organ Class and Preferred Term (Maintenance Phase) - by Subgroup - ATLAS-2M (Prior CAB + RPV of 0 Weeks)

Subgroup: Region (North America vs. Europe vs. Rest of World)

System Organ Class	Q8W (N=327)	Q4W (N=327)	OR (95%CI) /p-value	RD (95%CI) /p-value	RR (95%CI) /p-value	Inter-action p-value (RR)
Transaminases increased						
North America	0/118	0/135				
Europe	0/165	1/155 (<1%)				
Rest of World	0/ 44	0/ 37				

Note: "Any Event" represents subjects with any AE reported.

Note: By-subgroup OR, RD, RR and p-values are not provided when all levels of the subgroup have number of events less than 10 regardless of treatment group.
