Includes AEs with onset up to Day 405 (last day of Week 56 analysis visit window).
Only AEs of highest severity are counted.
Test for interaction based on RR (Log-binomial regression)
* indicates convergence problem. Result is uninterpretable.

Includes AEs with onset up to Day 405 (last day of Week 56 analysis visit window).
Only AEs of highest severity are counted.
Test for interaction based on RR (Log-binomial regression)
* indicates convergence problem. Result is uninterpretable.

Includes AEs with onset up to Day 405 (last day of Week 56 analysis visit window).
Only AEs of highest severity are counted.
Test for interaction based on RR (Log-binomial regression)
* indicates convergence problem. Result is uninterpretable.
