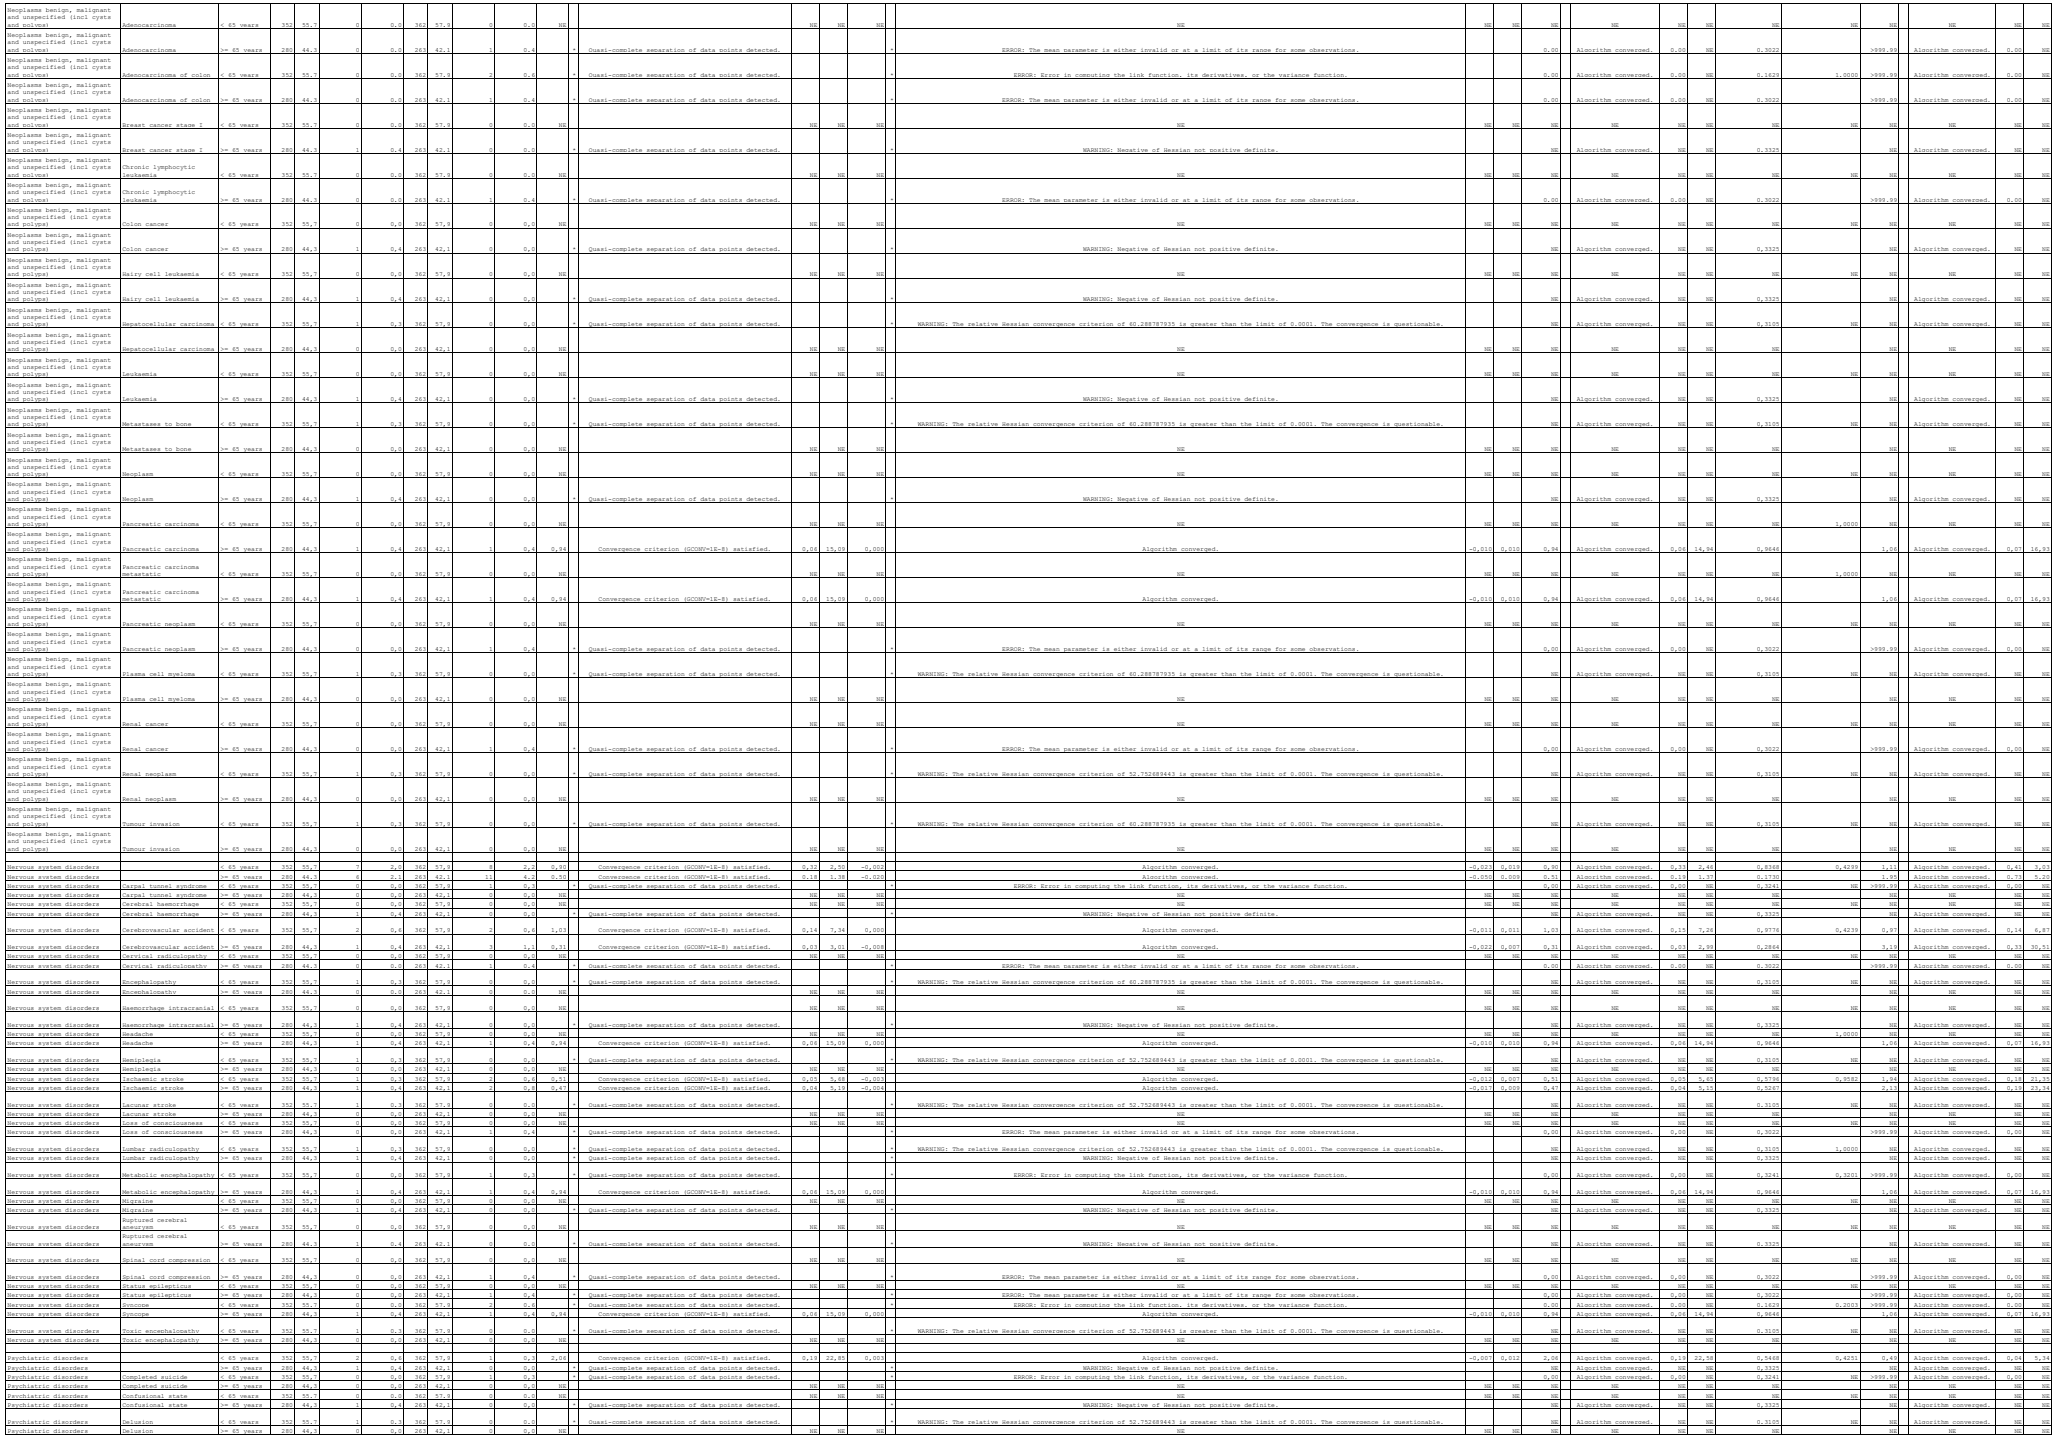
Only AEs of highest severity are counted.
Test for interaction based on RR (Log-binomial regression)
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021

Program: root/global/globalshare/morse_macros/current/prod/program/t_ae_raw_soc.sas
Output: root/clinical_studies/RO6867461/CDT70122/share/ACE_pool_DME_CSR_Final/prod/output_saf_bc/t_ae_raw_soc_sg_WSEVAE_SERC_OCTNOV2021_DME.xls
15MAR2022 13:19

POPULATION: Safety-Evaluable Population B vs. C
ENDPOINT: Severe AEs throughout the Entire Study
MODEL: Unstratified analysis
STUDY: GR40349 & GR40398
Dichotomous Analysis by Subgroups (Safety)



Age

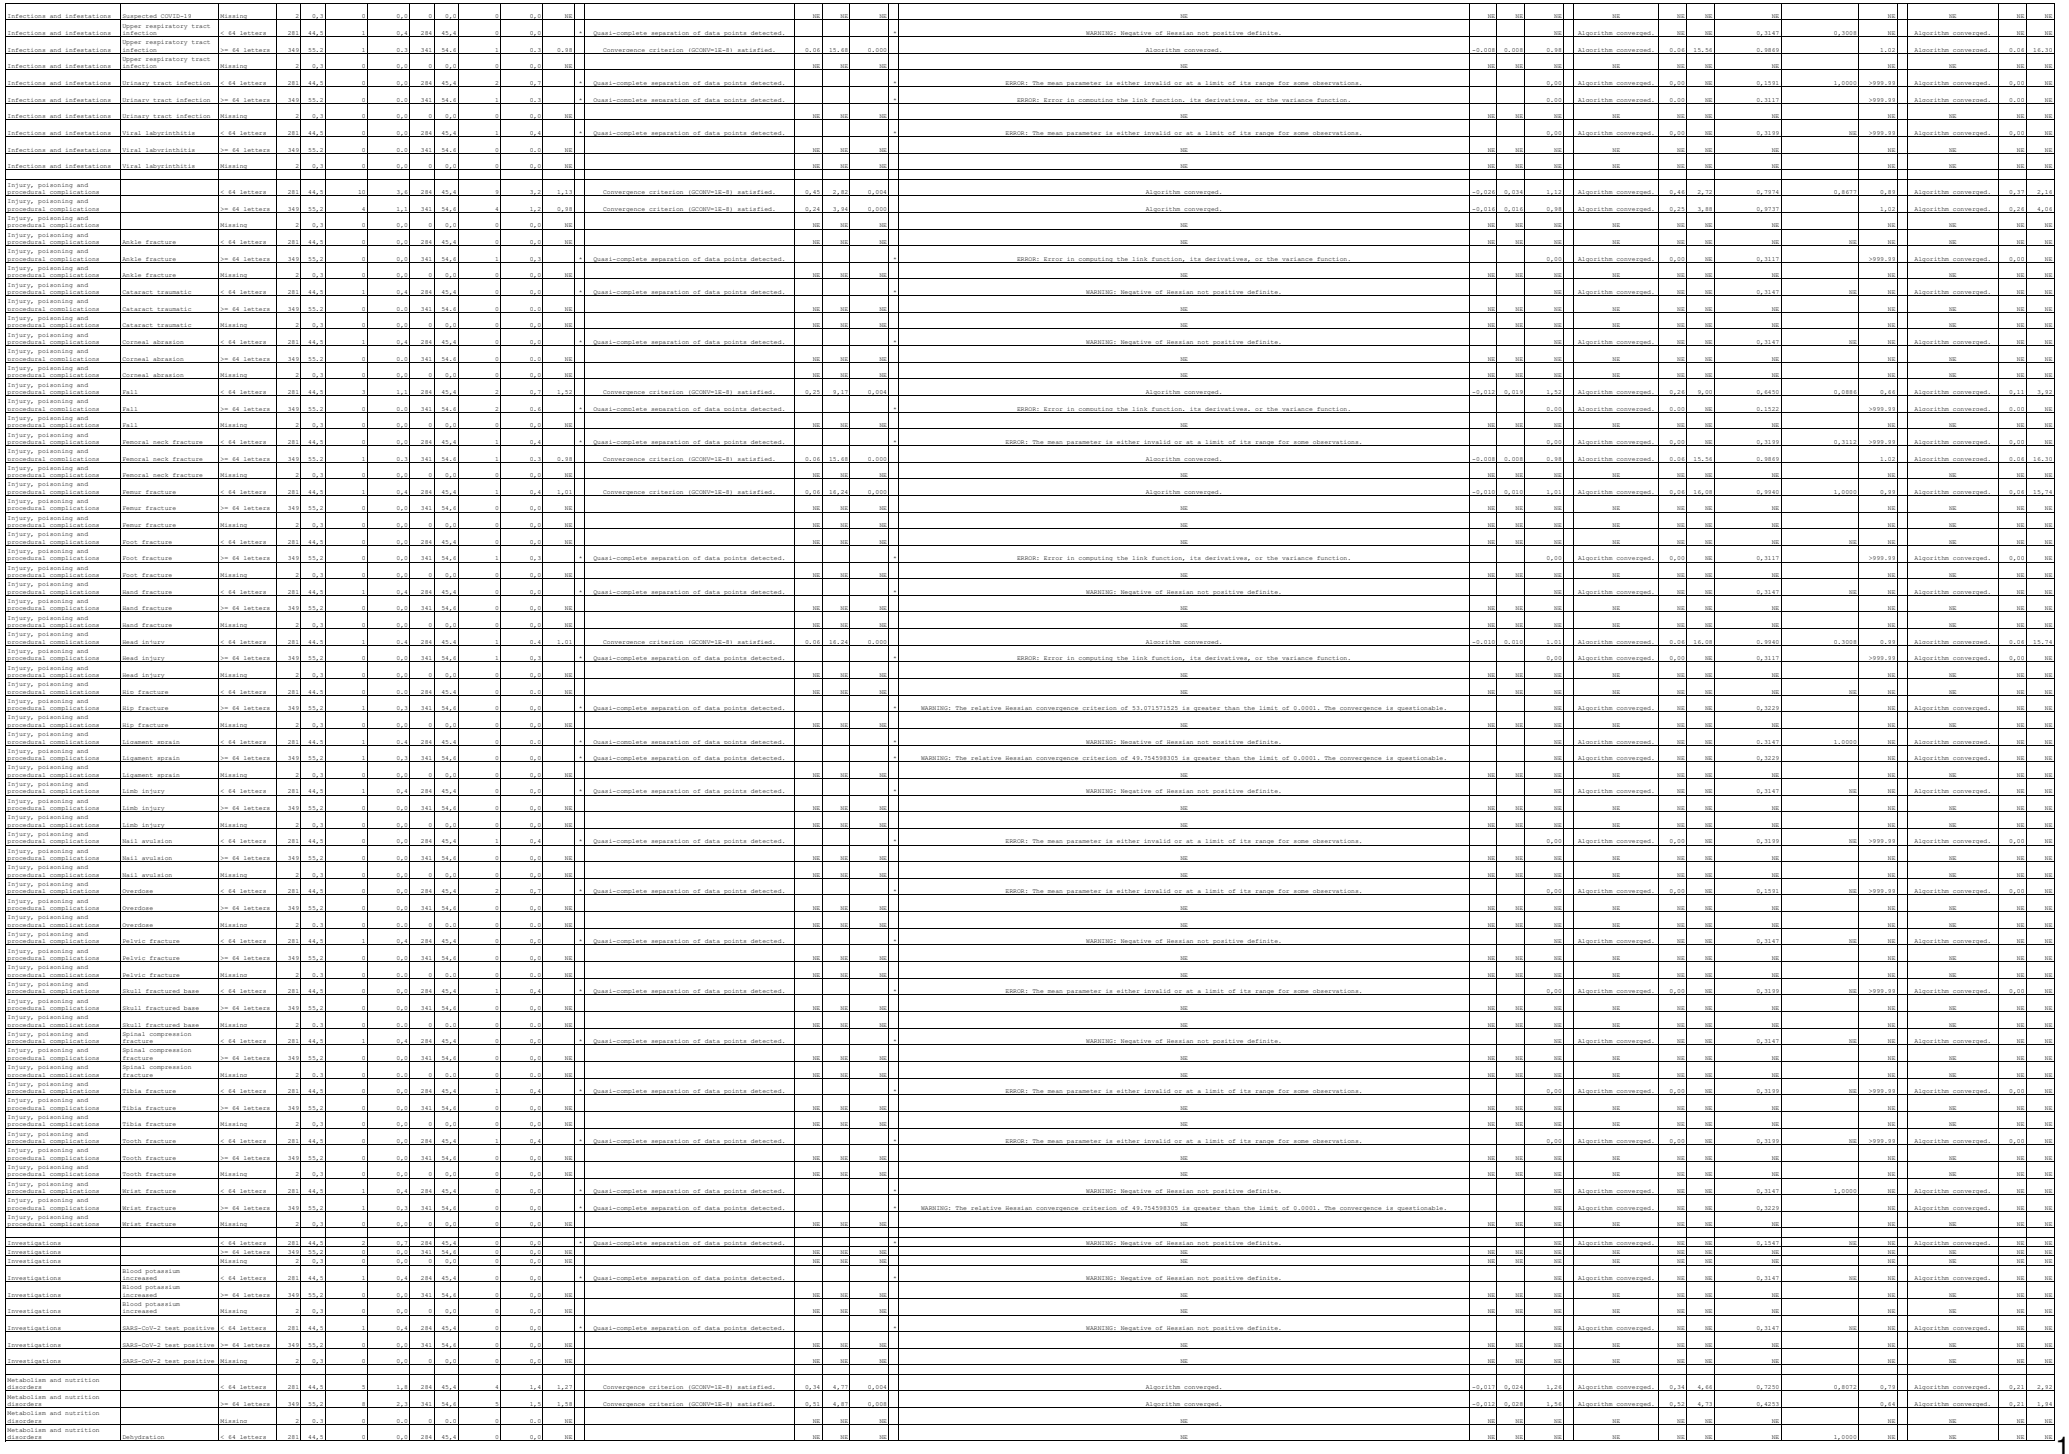
Only AEs of highest severity are counted.
Test for interaction based on RR (Log-binomial regression)
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021

Program: root/global/globalshare/morse_macros/current/prod/program/t_ae_raw_soc.sas
Output: root/clinical_studies/RO6867461/CO770122/share/ACE_pool_SME_CSR_Final/prod/output_saf_bc/t_ae_raw_soc_sq_WSEVAE_SERC_OCTNOV2021_SME.xls
15MAR2022 13:19

POPULATION: Safety-Evaluable Population B vs. C
ENDPOINT: Severe AEs throughout the Entire Study
MODEL: Unstratified analysis
STUDY: GR40349 & GR40398
Dichotomous Analysis by Subgroups (Safety)



Baseline BCVA ETDRS letter score

Includes AEs with onset up to Day 405 (last day of Week 56 analysis visit window).
Test for interaction based on RR (log-binomial regression)
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021

Program: root/clinical_studies/RO6867461/CDT70122/share/ACE_pool_DME_CSR_Final/prod/program/t_ae_raw_soc.sas
Output: root/clinical_studies/RO6867461/CDT70122/share/ACE_pool_DME_CSR_Final/prod/output_saf_bc/t_ae_raw_soc_sg_SAE_AEW56_SEBC_OCTNOV2021_DME.xls
11AUG2022 20:24

POPULATION: Safety-Evaluable Population B vs. C
ENDPOINT: Any SAEs through Week 56
MODEL: Unstratified analysis
STUDY: GR40349 & GR40398
Dichotomous Analysis by Subgroups (Safety)

POPULATION: Safety-Evaluable Population B vs. C
ENRICHMENT: Any SAEs throughout the Entire Study
MODEL: Unstratified analysis
STUDY: GR40349 & GR40398
Dichotomous Analysis by Subgroups (Safety)

Age

			Paricimab (PZ) (N=432)				Aflibercept (N=425)				Paricimab (PZ) vs. Aflibercept												Aflibercept vs. Paricimab (PZ)

Includes AEs with onset up to Day 405 (last day of Week 56 analysis visit window).
Test for interaction based on RR (Log-binomial regression)
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: YOSHMITH 03NOV2021 and RHINE 28OCT2021

Program: root/clinical_studies/RO6867461/CDT70122/share/ACE_pool_DME_CSR_Final/prod/program/t_ae_raw_soc.sas
Output: root/clinical_studies/RO6867461/CDT70122/share/ACE_pool_DME_CSR_Final/prod/output_saf_bc/t_ae_raw_soc_sq_DTHAE_AEW56_SEBC_OCTNOV2021_DME.xls
11AUG2022 19:56

POPULATION: Safety-Evaluable Population B vs. C
ENDPOINT: AEs leading to Death throughout the Entire Study
MODEL: Unstratified analysis
STUDY: GA40349 & GA40398
Dichotomous Analysis by Subgroups (Safety)

All

INTRAVITREAL STEROIDS	13 (4.1%)	8 (2.6%)	11 (3.5%)
SUBTENON STEROIDS	12 (3.8%)	4 (1.3%)	9 (2.9%)
STEROID IMPLANTS	4 (1.3%)	4 (1.3%)	3 (1.0%)

ANY OTHER PRIOR OCULAR THERAPY			
Total number of patients with at least one applicable therapy or treatment	9 (2.9%)	11 (3.5%)	8 (2.6%)
Total number of applicable therapies or treatments	16	13	9
OTHER	9 (2.9%)	11 (3.5%)	8 (2.6%)

IVT = Intravitreal; PRP = Panretinal Photocoagulation; VEGF = Vascular Endothelial Growth Factor.
For frequency counts by therapy or treatment, multiple occurrences of the same therapy or treatment in an individual are counted only once.
For the total number of therapies or treatments, multiple occurrences of the same therapy or treatment in an individual are counted separately.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021

Treatments are coded using the WHO Drug Global B3 Format dictionary Version September 1, 2020.
Treatments can appear under multiple classes.
Multiple uses of a specific medication for a patient were counted once in the frequency for the medication. Likewise, multiple uses within a specific medication class for a patient were counted once in the frequency for the medication class.
For frequency counts in the "total number of treatments", multiple uses of the same treatment for a patient were counted separately.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021

Treatments are coded using the WHO Drug Global B3 Format dictionary Version September 1, 2020.
Treatments can appear under multiple classes.
Multiple uses of a specific medication for a patient were counted once in the frequency for the medication. Likewise, multiple uses within a specific medication class for a patient were counted once in the frequency for the medication class.
For frequency counts in the "total number of treatments", multiple uses of the same treatment for a patient were counted separately.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021

Treatments are coded using the WHO Drug Global B3 Format dictionary Version September 1, 2020.
Treatments can appear under multiple classes.
Multiple uses of a specific medication for a patient were counted once in the frequency for the medication. Likewise, multiple uses within a specific medication class for a patient were counted once in the frequency for the medication class.
For frequency counts in the "total number of treatments", multiple uses of the same treatment for a patient were counted separately.
Clinical cut-off: YOSEMITE 01NOV2021 and RHINE 28OCT2021
