Subgroup Study	Finerenone + SoC Events / Total	Placebo + SoC Events / Total	Weight (%)	Odds ratio (fixed effect) 95% CI	Overall treatment effect
Overall					
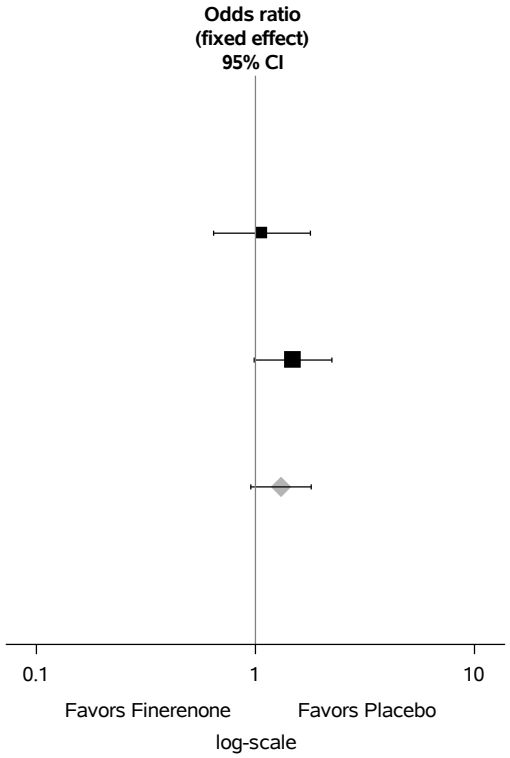
FIDELIO-DKD	31 / 2827	29 / 2831	39.2	1.07 [0.64,1.78]	
FIGARO-DKD	58 / 3683	39 / 3658	60.8	1.48 [0.99,2.23]	
Total	89 / 6510	68 / 6489		1.31 [0.95,1.80]	Z=1.66, p=0.0972
Heterogeneity:	Q=0.96 (df=1)	p=0.3270	I^2=0.0%		



Abbreviations: CI=confidence interval, CVD=cardiovascular disease, eGFR=estimated glomerular filtration rate, GLM=generalized linear model, KDIGO=Kidney Disease: Improving Global Outcomes, N=number of subjects, PT=preferred term, OR=odds ratio, SOC=system organ class, SoC=standard of care, TE(S)AE=treatment-emergent (serious) adverse event.
Note: For single studies the OR is estimated by a GLM with classification term for treatment using a binomial distribution and logit as link function.
For 'Total' the same model as for single studies including study as additional factor was applied.
The heterogeneity between studies was analyzed using Cochrane's Q statistic with inverse variance weights.

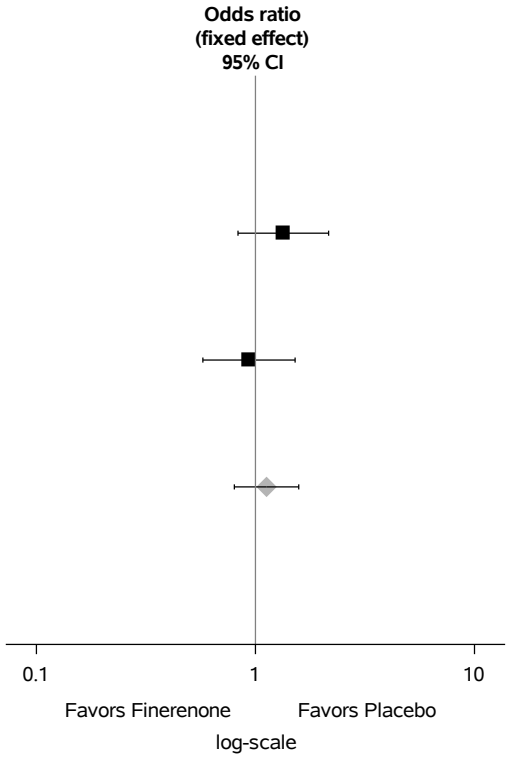
FIGARO-DKD	32 / 3683	34 / 3658	49.1	0.93 [0.58,1.52]	
Total	72 / 6510	64 / 6489		1.12 [0.80,1.58]	Z=0.67, p=0.5002
Heterogeneity:	Q=1.08 (df=1)	p=0.2982	I^2=7.6%		



Abbreviations: CI=confidence interval, CVD=cardiovascular disease, eGFR=estimated glomerular filtration rate, GLM=generalized linear model, KDIGO=Kidney Disease: Improving Global Outcomes, N=number of subjects, PT=preferred term, OR=odds ratio, SOC=system organ class, SoC=standard of care, TE(S)AE=treatment-emergent (serious) adverse event.
Note: For single studies the OR is estimated by a GLM with classification term for treatment using a binomial distribution and logit as link function.
For 'Total' the same model as for single studies including study as additional factor was applied.
The heterogeneity between studies was analyzed using Cochrane's Q statistic with inverse variance weights.

Note: For single studies the OR is estimated by a GLM with classification term for treatment using a binomial distribution and logit as link function.
For 'Total' the same model as for single studies including study as additional factor was applied.
The heterogeneity between studies was analyzed using Cochrane's Q statistic with inverse variance weights. The same method was applied to assess the heterogeneity between subgroups.
Category 'Missing' was excluded from meta-analysis.

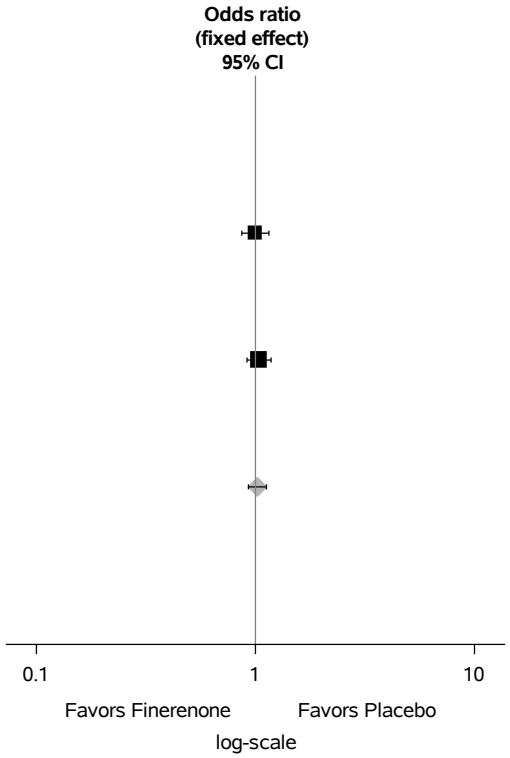
FIDELIO-DKD	450 / 2827	451 / 2831	44.1	1.00 [0.87,1.15]	
FIGARO-DKD	578 / 3683	556 / 3658	55.9	1.04 [0.92,1.18]	
Total	1028 / 6510	1007 / 6489		1.02 [0.93,1.12]	Z=0.43, p=0.6679
Heterogeneity:	Q=0.16 (df=1)	p=0.6899	I^2=0.0%		



Abbreviations: CI=confidence interval, CVD=cardiovascular disease, eGFR=estimated glomerular filtration rate, GLM=generalized linear model, KDIGO=Kidney Disease: Improving Global Outcomes, N=number of subjects, PT=preferred term, OR=odds ratio, SOC=system organ class, SoC=standard of care, TE(S)AE=treatment-emergent (serious) adverse event.
Note: For single studies the OR is estimated by a GLM with classification term for treatment using a binomial distribution and logit as link function.
For 'Total' the same model as for single studies including study as additional factor was applied.
The heterogeneity between studies was analyzed using Cochrane's Q statistic with inverse variance weights.

Abbreviations: CI=confidence interval, CVD=cardiovascular disease, eGFR=estimated glomerular filtration rate, GLM=generalized linear model, KDIGO=Kidney Disease: Improving Global Outcomes, N=number of subjects, PT=preferred term, OR=odds ratio, SOC=system organ class, SoC=standard of care, TE(S)AE=treatment-emergent (serious) adverse event.
Note: For single studies the OR is estimated by a GLM with classification term for treatment using a binomial distribution and logit as link function.
For 'Total' the same model as for single studies including study as additional factor was applied.
The heterogeneity between studies was analyzed using Cochrane's Q statistic with inverse variance weights. The same method was applied to assess the heterogeneity between subgroups.
Category 'Missing' was excluded from meta-analysis.
