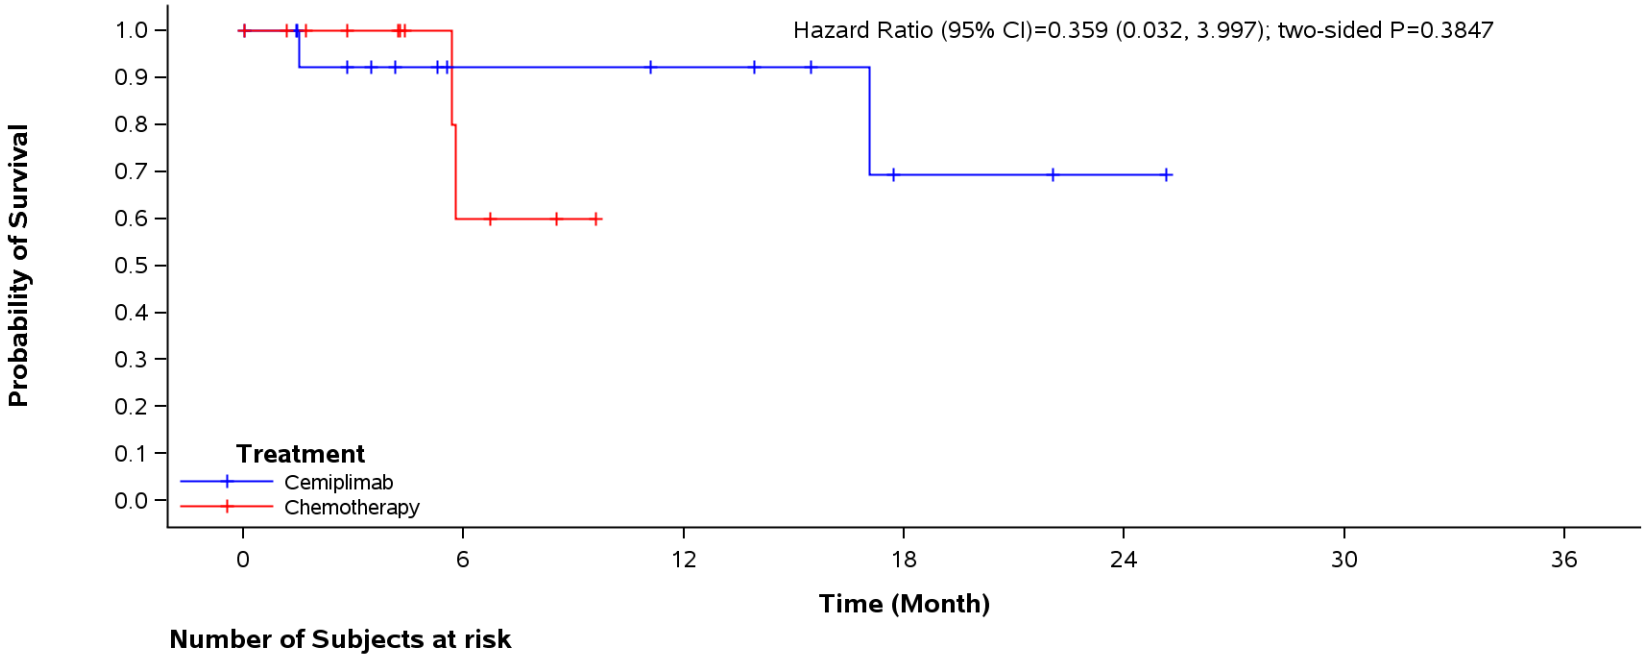
Cognitive Functioning - 10 pts sensitivity sustained deterioration



**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 113 | 35 | 16 | 4 | 0 | 0 | 0 |
| Chemotherapy | 114 | 22 | 1 | 1 | 0 | 0 | 0 |

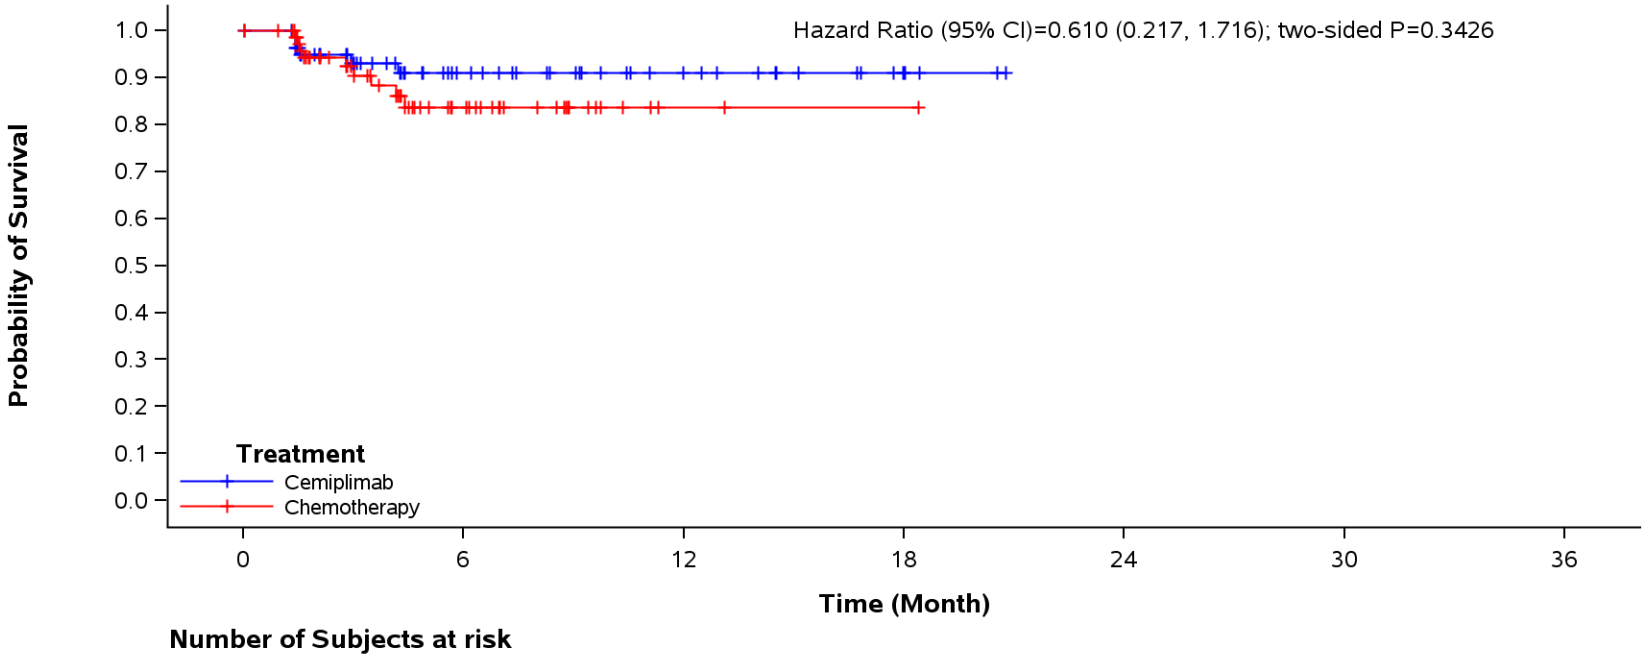
Data cut-off as of Jan 4th, 2021.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Figure 2.2.8a. Time to First Sensitivity Sustained Deterioration with C30 10-points Threshold, Last Observation Carried Forward by Subgroup without PD-L1 (Full Analysis Set Exclude Patients Assigned to Gemcitabine)

Baseline ECOG Status: 1

Constipation - 10 pts sensitivity sustained deterioration



Number of Subjects at risk

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 113 | 32 | 15 | 5 | 0 | 0 | 0 |
| Chemotherapy | 114 | 23 | 2 | 1 | 0 | 0 | 0 |

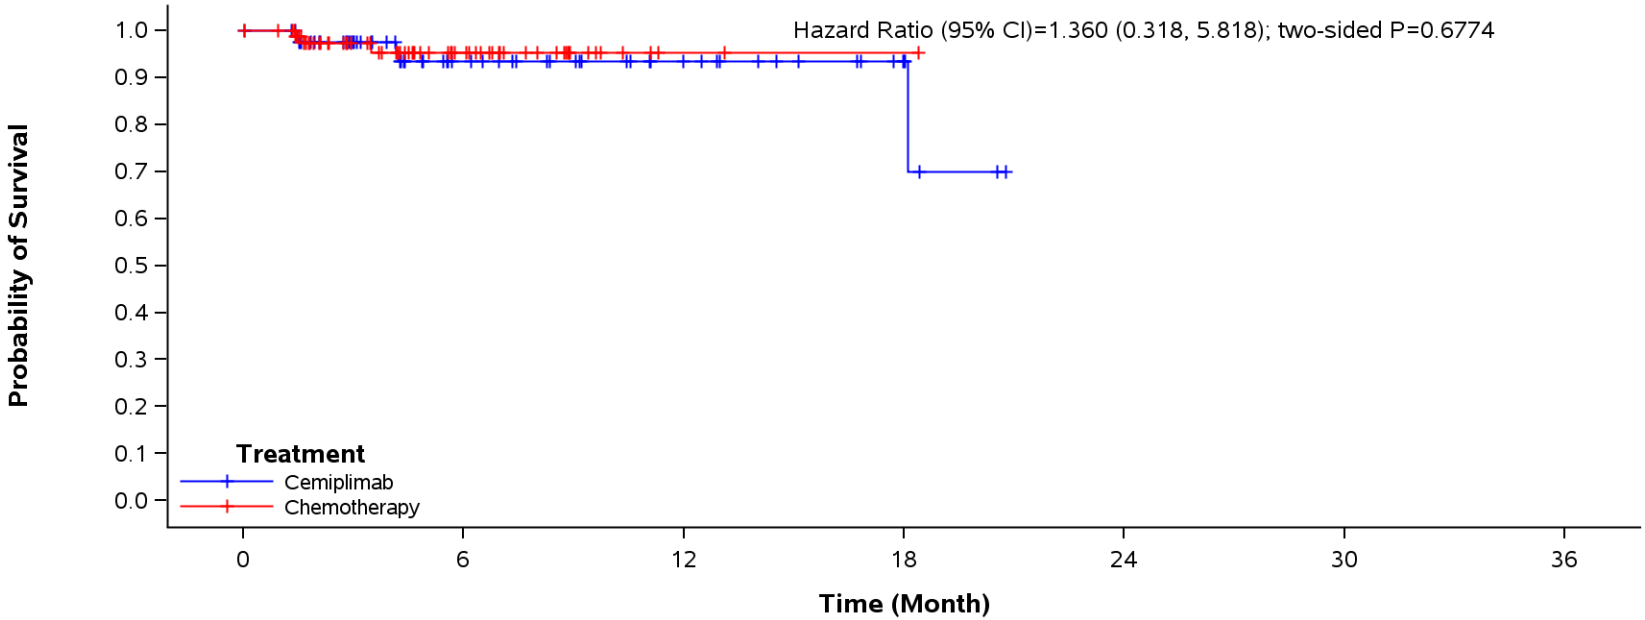
Data cut-off as of Jan 4th, 2021.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Figure 2.2.8a. Time to First Sensitivity Sustained Deterioration with C30 10-points Threshold, Last Observation Carried Forward by Subgroup without PD-L1 (Full Analysis Set Exclude Patients Assigned to Gemcitabine)

Baseline ECOG Status: 1

Diarhoea - 10 pts sensitivity sustained deterioration



**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 113 | 35 | 16 | 6 | 0 | 0 | 0 |
| Chemotherapy | 114 | 26 | 2 | 1 | 0 | 0 | 0 |

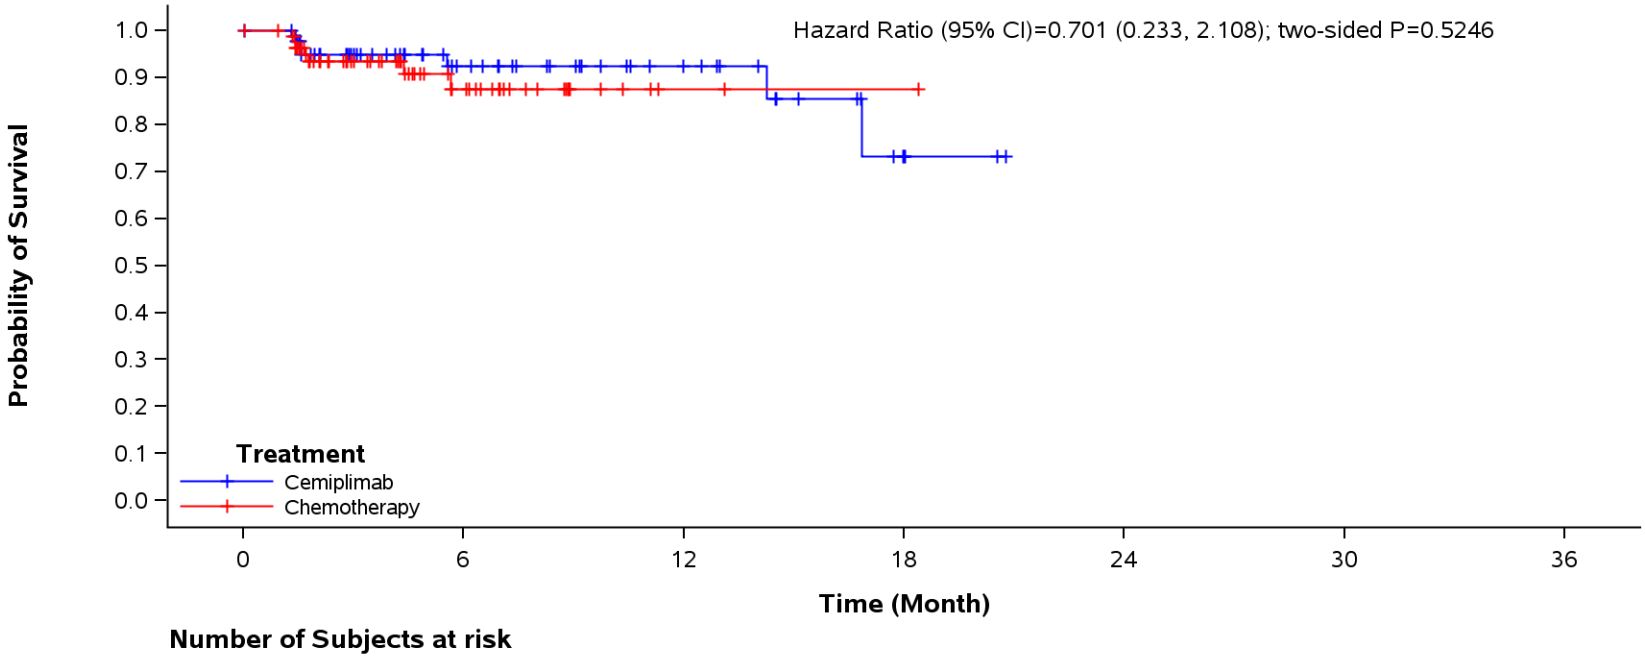
Data cut-off as of Jan 4th, 2021.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Figure 2.2.8a. Time to First Sensitivity Sustained Deterioration with C30 10-points Threshold, Last Observation Carried Forward by Subgroup without PD-L1 (Full Analysis Set Exclude Patients Assigned to Gemcitabine)

Baseline ECOG Status: 1

Dyspnoea - 10 pts sensitivity sustained deterioration



**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 113 | 36 | 17 | 4 | 0 | 0 | 0 |
| Chemotherapy | 114 | 23 | 2 | 1 | 0 | 0 | 0 |

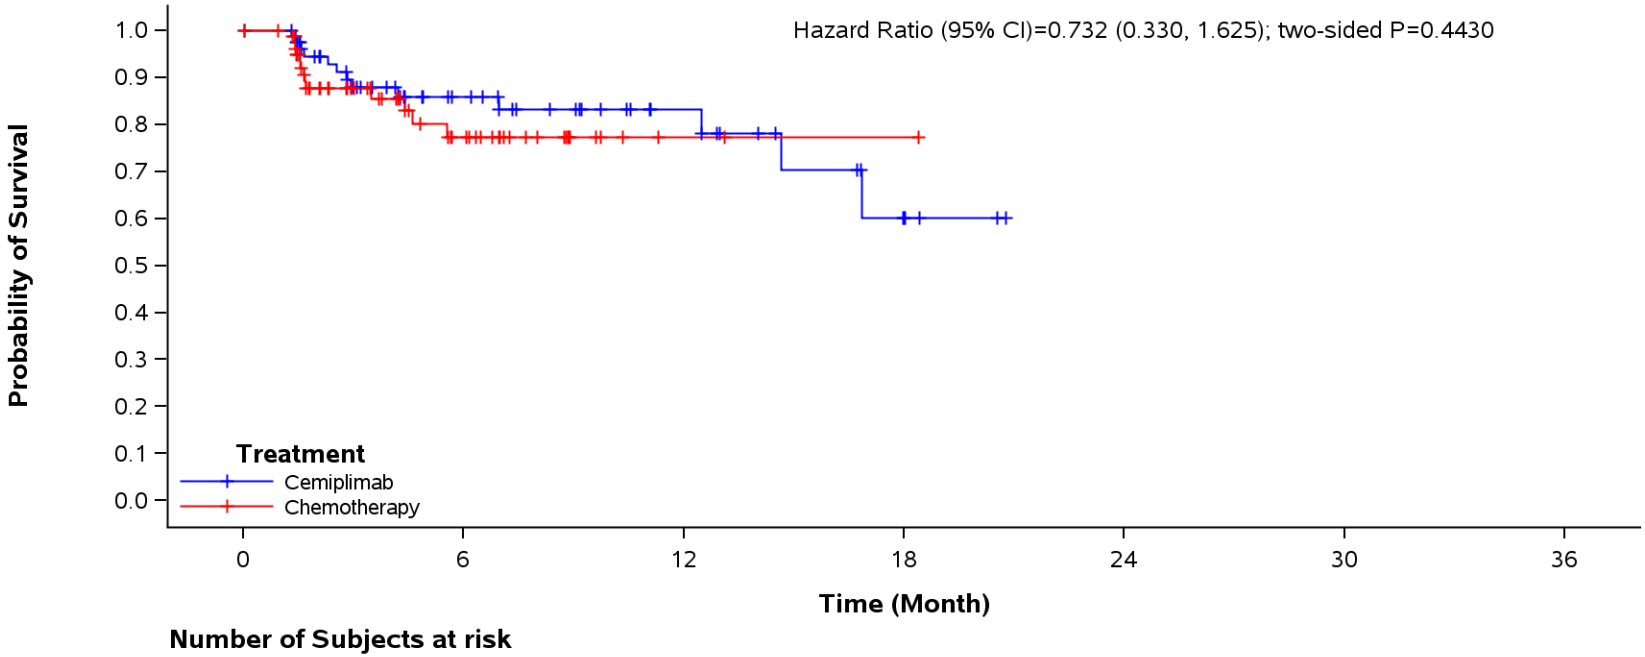
Data cut-off as of Jan 4th, 2021.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Figure 2.2.8a. Time to First Sensitivity Sustained Deterioration with C30 10-points Threshold, Last Observation Carried Forward by Subgroup without PD-L1 (Full Analysis Set Exclude Patients Assigned to Gemcitabine)

Baseline ECOG Status: 1

Emotional Functioning - 10 pts sensitivity sustained deterioration



**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 113 | 35 | 16 | 5 | 0 | 0 | 0 |
| Chemotherapy | 114 | 23 | 2 | 1 | 0 | 0 | 0 |

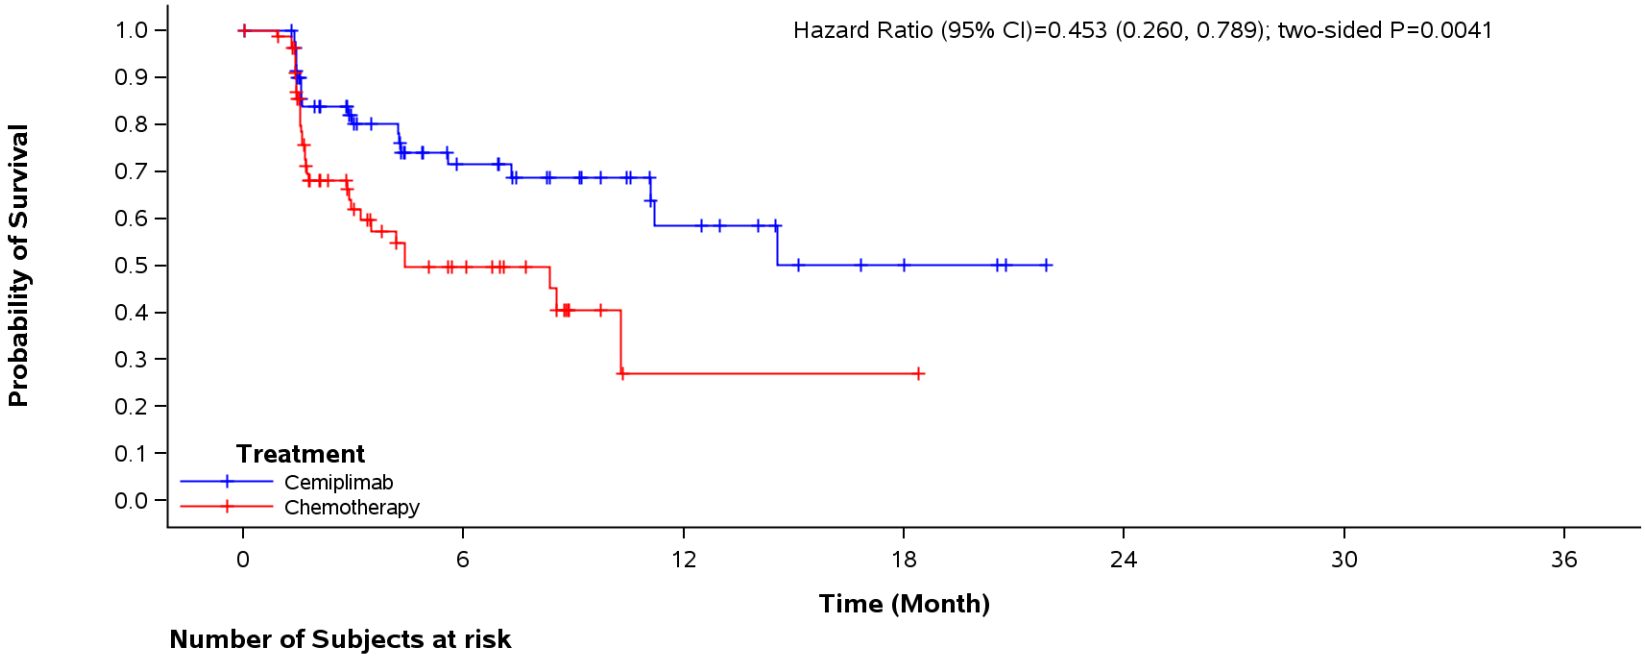
Data cut-off as of Jan 4th, 2021.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Figure 2.2.8a. Time to First Sensitivity Sustained Deterioration with C30 10-points Threshold, Last Observation Carried Forward by Subgroup without PD-L1 (Full Analysis Set Exclude Patients Assigned to Gemcitabine)

Baseline ECOG Status: 1

Fatigue - 10 pts sensitivity sustained deterioration



**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 113 | 28 | 11 | 4 | 0 | 0 | 0 |
| Chemotherapy | 114 | 16 | 1 | 1 | 0 | 0 | 0 |

Data cut-off as of Jan 4th, 2021.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.
Post baseline score is imputed using LOCF, then sustained improvement means those with consecutive achievement of 10 points improvement till the last assessment. For all 10 points improvement included in sustained improvement, the date of first 10 points improvement is used in the calculation of time. Time is defined as (date of first 10 points sustained improvement - Date of Randomization +1)/ 365.25*12

Dyspnoea - 10 pts sustained improvement

**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 105 | 10 | 1 | 0 | 0 | 0 | 0 |
| Chemotherapy | 103 | 5 | 0 | 0 | 0 | 0 | 0 |

Data cut-off as of Jan 4th, 2021.
Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.
Post baseline score is imputed using LOCF, then sustained improvement means those with consecutive achievement of 10 points improvement till the last assessment. For all 10 points improvement included in sustained improvement, the date of first 10 points improvement is used in the calculation of time. Time is defined as (date of first 10 points sustained improvement - Date of Randomization +1)/ 365.25*12

| Chemotherapy | 50 | 9 | 1 | 0 | 0 | 0 | 0 |

Data cut-off as of Jan 4th, 2021.
Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.
Post baseline score is imputed using LOCF, then sustained deterioration means those with consecutive achievement of 10 points deterioration till the last assessment. For all 10 points deterioration included in sustained deterioration, the date of first 10 points deterioration is used in the calculation of time. Time is defined as (date of first 10 points sustained deterioration - Date of Randomization +1)/ 365.25*12
Patients who reach the threshold for the first time at the last documented visit are censored

Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.
Post baseline score is imputed using LOCF, then sustained deterioration means those with consecutive achievement of 10 points deterioration till the last assessment. For all 10 points deterioration included in sustained deterioration, the date of first 10 points deterioration is used in the calculation of time. Time is defined as (date of first 10 points sustained deterioration - Date of Randomization +1)/ 365.25*12

| Chemotherapy | 50 | 10 | 2 | 0 | 0 | 0 | 0 |

Data cut-off as of Jan 4th, 2021.
Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.
Post baseline score is imputed using LOCF, then sustained deterioration means those with consecutive achievement of 10 points deterioration till the last assessment. For all 10 points deterioration included in sustained deterioration, the date of first 10 points deterioration is used in the calculation of time. Time is defined as (date of first 10 points sustained deterioration - Date of Randomization +1)/ 365.25*12

Table 4.1.1. Best Overall Tumor Response Rate per RECIST 1.1 - CMH Test
(Full Analysis Set Exclude Patients Assigned to Gemcitabine)

| | Cemiplimab (N=196) | Chemotherapy (N=183) |
|---|---|---|
| Best Overall Tumor Response, n(%) | | |
| Complete Response (CR) [a] | 7 (3.6%) | 2 (1.1%) |
| Partial Response (PR) [a] | 26 (13.3%) | 11 (6.0%) |
| Stable Disease (SD) [b] | 77 (39.3%) | 87 (47.5%) |
| Progressive Disease (PD) | 70 (35.7%) | 52 (28.4%) |
| Not Evaluable (NE) | 16 (8.2%) | 31 (16.9%) |
| Response | | |
| Objective Response Rate (ORR:CR+PR) | 33 (16.8%) | 13 (7.1%) |
| 95% CI for ORR [c] | (11.9%, 22.8%) | (3.8%, 11.8%) |
| Stratified CMH test One-sided p-value [d] | 0.00361 | |
| Odds ratio (95% CI) [d] | 2.512 (1.267, 4.977) | |

Data cut-off as of Jan 4th, 2022.
[a] CR/PR must be confirmed by repeated assessments no less than 4 weeks apart
[b] SD criteria must be met at least once for a minimum duration of 4 weeks after first dose date
[c] Clopper-Person exact confidence interval.
[d] One-sided p-value and odds ratio using geographic region and histology stratified Cochran-Mantel-Haenszel test. Due to the low response rate in the Chemotherapy arm, the results from CMH test should be interpreted with caution.

Table 5.1.1. Overall Survival
(Full Analysis Set Exclude Patients Assigned to Gemcitabine)

| | Cemiplimab (N=196) | Chemotherapy (N=183) |
|---|---|---|
| Number of deaths, n (%) | 140 (71.4%) | 151 (82.5%) |
| Number of censored patients, n (%) | 56 (28.6%) | 32 (17.5%) |
| | | |
| Median (95% CI), (Months) [a] | 12.4 (8.3, 14.9) | 8.0 (7.0, 9.7) |
| Stratified log-rank test 2-sided p-value [b][c] | <0.0001 | |
| HR (95% CI) [b][d] | 0.626 (0.495, 0.793) | |
| HR P-Value [b][d] | 0.0001 | |
| | | |
| Estimated Survival Probability, %(95% CI)[a] | | |
| 6 months | 66.6 (59.5, 72.7) | 63.4 (55.7, 70.2) |
| 12 months | 52.4 (45.1, 59.2) | 34.4 (27.2, 41.7) |
| 18 months | 35.3 (28.5, 42.2) | 18.1 (12.6, 24.4) |
| 24 months | 29.7 (23.2, 36.4) | 10.4 (6.1, 16.1) |
| 30 months | 24.0 (17.5, 31.1) | 6.4 (2.9, 11.7) |
| 36 months | 22.6 (16.1, 29.9) | 5.1 (2.0, 10.4) |

Data cut-off as of Jan 4th, 2022.
[a] Based on Kaplan-Meier method.
[b] Stratified by geographic region (North America versus Asia versus ROW) and Histology (SCC versus adenocarcinoma) according to IWRS.
[c] Two-sided p-value is from stratified log-rank test.
[d] Based on stratified proportional hazards model (cemiplimab vs chemotherapy).

Table 5.1.3. Kaplan-Meier Estimation of Duration of Response
(Full Analysis Set Exclude Patients Assigned to Gemcitabine - Patients with Confirmed CR or PR)

(Safety Analysis Set Exclude Patients Assigned to Gemcitabine)

Baseline ECOG Status: 0

Data cut-off as of Jan 4th, 2022.
Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Choice of IC chemotherapy: Vinorelbine
SOC: Vascular disorders
PT: Deep vein thrombosis

**Number of Subjects at risk**

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cemiplimab | 32 | 8 | 3 | 3 | 2 | 0 | 0 |
| Chemotherapy | 28 | 7 | 1 | 0 | 0 | 0 | 0 |

Data cut-off as of Jan 4th, 2022.
Hazard ratio is based on unstratified proportional hazards model (cemiplimab vs chemotherapy). Two-sided p-value is from unstratified log-rank test.

Table 12.2.4. Time to First Any Treatment-Emergent Adverse Events of Interest - Immune-Related AE (Grade 3)
(Safety Analysis Set Exclude Patients Assigned to Gemcitabine)

| | Cemiplimab (N=195) | Chemotherapy (N=172) |
|---|---|---|
| Patients with event, n (%) | 24 (12.3%) | 0 |
| Censored Patients, n (%) | 171 (87.7%) | 172 (100.0%) |
| Median (95% CI), (Months) [a] | NE (NE, NE) | NE (NE, NE) |
| Unstratified log-rank test 2-sided p-value [b] | <0.0001 | |
| HR (95% CI) [c] | 24134715 (0.000, NE) | |
| HR P-Value [c] | 0.9882 | |
| Estimated Event-Free Probability, %(95% CI)[a] | | |
| 6 months | 85.4 (78.0, 90.4) | 100.0 (100.0, 100.0) |
| 12 months | 82.8 (74.6, 88.6) | 100.0 (100.0, 100.0) |
| 18 months | 80.4 (70.8, 87.2) | 100.0 (100.0, 100.0) |
| 24 months | 80.4 (70.8, 87.2) | NE (NE, NE) |
| 30 months | NE (NE, NE) | NE (NE, NE) |

Data cut-off as of Jan 4th, 2022.
[a] Based on Kaplan-Meier method.
[b] Two-sided p-value is from unstratified log-rank test.
[c] Based on unstratified proportional hazards model (cemiplimab vs chemotherapy).

Table 12.2.5. Time to First Any Treatment-Emergent Adverse Events of Interest - Infusion-Related Reactions (Grade >=2)
(Safety Analysis Set Exclude Patients Assigned to Gemcitabine)

| | Cemiplimab (N=195) | Chemotherapy (N=172) |
|---|---|---|
| Patients with event, n (%) | 3 (1.5%) | 0 |
| Censored Patients, n (%) | 192 (98.5%) | 172 (100.0%) |
| Median (95% CI), (Months) [a] | NE (NE, NE) | NE (NE, NE) |
| Unstratified log-rank test 2-sided p-value [b] | 0.1033 | |
| HR (95% CI) [c] | 26324080 (0.000, NE) | |
| HR P-Value [c] | 0.9957 | |
| Estimated Event-Free Probability, %(95% CI)[a] | | |
| 6 months | 98.5 (95.3, 99.5) | 100.0 (100.0, 100.0) |
| 12 months | 98.5 (95.3, 99.5) | 100.0 (100.0, 100.0) |
| 18 months | 98.5 (95.3, 99.5) | 100.0 (100.0, 100.0) |
| 24 months | 98.5 (95.3, 99.5) | NE (NE, NE) |
| 30 months | NE (NE, NE) | NE (NE, NE) |

Data cut-off as of Jan 4th, 2022.
[a] Based on Kaplan-Meier method.
[b] Two-sided p-value is from unstratified log-rank test.
[c] Based on unstratified proportional hazards model (cemiplimab vs chemotherapy).

Table 12.2.6. Time to First Any Treatment-Emergent Adverse Events of Interest - Allergic/Hypersensitivity Reactions (Grade >=2)
(Safety Analysis Set Exclude Patients Assigned to Gemcitabine)

| | Cemiplimab (N=195) | Chemotherapy (N=172) |
|---|---|---|
| Patients with event, n (%) | 1 (0.5%) | 0 |
| Censored Patients, n (%) | 194 (99.5%) | 172 (100.0%) |
| Median (95% CI), (Months) [a] | NE (NE, NE) | NE (NE, NE) |
| Unstratified log-rank test 2-sided p-value [b] | 0.3476 | |
| HR (95% CI) [c] | 26258353 (0.000, NE) | |
| HR P-Value [c] | 0.9975 | |
| Estimated Event-Free Probability, %(95% CI)[a] | | |
| 6 months | 99.5 (96.4, 99.9) | 100.0 (100.0, 100.0) |
| 12 months | 99.5 (96.4, 99.9) | 100.0 (100.0, 100.0) |
| 18 months | 99.5 (96.4, 99.9) | 100.0 (100.0, 100.0) |
| 24 months | 99.5 (96.4, 99.9) | NE (NE, NE) |
| 30 months | NE (NE, NE) | NE (NE, NE) |

Data cut-off as of Jan 4th, 2022.
[a] Based on Kaplan-Meier method.
[b] Two-sided p-value is from unstratified log-rank test.
[c] Based on unstratified proportional hazards model (cemiplimab vs chemotherapy).
