Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: GO29365 21OCT2021 and YO41543 07FEB2022

Program: root/clinical_studies/RO5541077/CDPT7898/GO29365/data_analysis/ACE_FINAL_CSR_Pooled/prod/program/t_s_ttae_soc.sas
Output: root/clinical_studies/RO5541077/CDPT7898/GO29365/data_analysis/ACE_FINAL_CSR_Pooled/prod/output/t_s_ttae_soc_sgl_TTGR345AE_L3PLUS_ARMCDPLUSSE_29365_41543.xls
30NOV2022 19:54

POPULATION: Safety Population, Arms C,D (Study 365)+Polarose, Third-line or beyond (3L+) Patients
ENDPOINT: Time to first grade 3/4/5 adverse event
MODEL: Unstratified analysis
STUDIES: GO29365, YO41543
Time to Event Analysis by Subgroups (Safety)

Age (years)

			Pola+BR (N=47)						BR (N=36)						Pola + BR vs. BR

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: GO29365 21OCT2021 and YO41543 07FEB2022

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: GO29365 21OCT2021 and YO41543 07FEB2022

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: GO29365 21OCT2021 and YO41543 07FEB2022

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Output: root/clinical_studies/RO5541077/CDPT7898/GO29365/data_analysis/ACE_FINAL_CSR_Pooled/prod/output_365/t_s_ttae_soc_sgl_TTGR3AE_L2_ARMCDSE_365_29365_41543.xls
30NOV2022 23:40

POPULATION: Study GO29365, Safety Population, Arms C,D, Second-line (2L) Patients
ENDPOINT: Time to first grade 3 adverse event
MODEL: Unstratified analysis
STUDIES: GO29365, YO41543
Time to Event Analysis by Subgroups (Safety)

POPULATION: Study GO29365, Safety Population, Arms C,D, Second-line (2L) Patients
ENDPOINT: Time to first grade 3 adverse event
MODEL: Unstratified analysis
STUDIES: GO29365, YO41543
Time to Event Analysis by Subgroups (Safety)

Sex

			Pola+BR (N=11)						BR (N=12)						Pola + BR vs. BR
