Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* Indicates convergence problem, Result is uninterpretable.
** Defined as no response or progression or relapse within 6 months of last anti-lymphoma therapy end date.
Study was included as a covariate in the Cox regression models.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: GO29365 21OCT2021 and YO41543 07FEB2022

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

RESPIRATORY, THORACIC AND MEDIASTINAL DISORDERS	PULMONARY OEDEMA	Male	14	73.7	1	7.1	13	92.9	8	47.1	0	-	8	100.0	0.4497	>999.99	0.00	NE		Convergence criterion (GCONV=1E-8) satisfied.	-
RESPIRATORY, THORACIC AND MEDIASTINAL DISORDERS	PULMONARY OEDEMA	Female	5	26.3	0	-	5	100.0	9	52.9	0	-	9	100.0	NE	NE	NE	NE		Convergence criterion (GCONV=1E-8) satisfied.	

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* Indicates convergence problem, Result is uninterpretable.
** Defined as no response or progression or relapse within 6 months of last anti-lymphoma therapy end date.
Study was included as a covariate in the Cox regression models.

Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* Indicates convergence problem, Result is uninterpretable.
** Defined as no response or progression or relapse within 6 months of last anti-lymphoma therapy end date.
Study was included as a covariate in the Cox regression models.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
Clinical cut-off: GO29365 21OCT2021 and YO41543 07FEB2022

Program: root/clinical_studies/RO5541077/CDPT7898/GO29365/data_analysis/ACE_FINAL_CSR_Pooled/prod/program/t_s_ttae_soc.sas
Output: root/clinical_studies/RO5541077/CDPT7898/GO29365/data_analysis/ACE_FINAL_CSR_Pooled/prod/output/t_s_ttae_soc_sgl_TTAE_L3PLUS_ARMCDPLUSSE_29365_41543.xls
30NOV2022 18:58

POPULATION: Safety Population, Arms C,D (Study 365)+Polarose, Third-line or beyond (3L+) Patients
ENDPOINT: Time to first adverse event
MODEL: Unstratified analysis
STUDIES: GO29365, YO41543
Time to Event Analysis by Subgroups (Safety)

Age (years)

			Pola+BR (N=47)						BR (N=36)						Pola + BR vs. BR						
			Patients		Patients with Event		Censored		Patients		Patients with Event		Censored		log-rank	Hazard Ratio					Interaction Test

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.

Study was included as a covariate in the Cox regression model.
Test for interaction based on Likelihood-Ratio test for interaction with treatment effect
* indicates convergence problem. Result is uninterpretable.
