SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 2	0	0	0	0

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 2	0	0	0	0

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 1	0	0	0	0

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 4	0	1 (9.1%)	1 (2.2%)	1 (1.6%)
Pulmonary thrombotic and embolic conditions	0	0	0	0

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 1	0	0	0	1 (3.0%)

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Cardiac signs and symptoms NEC	1 (2.9%)	0	1 (2.2%)	1 (1.6%)
Grade 1	1 (2.9%)	0	1 (2.2%)	1 (1.6%)

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Grade 2	0	0	0	0
Grade 3	0	0	0	1 (3.0%)
Femur fracture	0	0	0	1 (3.0%)

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Grade 1	1 (2.9%)	0	1 (2.2%)	1 (1.6%)

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 1	1 (1.9%)	0	1 (1.4%)	0	0	0

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

Grade 1	1 (1.9%)	0	1 (1.4%)	0	0	0

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

SAF-Anemic Analysis Set includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0.
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term;

Data Extracted: CRF data: 25JUN2019
