SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Lung disorder	0	0	0	0	0	0
Grade 2	0	0	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 3	0	0	0	1 (2.2%)	0	1 (1.0%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Grade 1	0	0	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Retching	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Anaemias haemolytic NEC	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Grade 1	0	1 (3.1%)	1 (2.0%)	1 (1.8%)
Oropharyngeal pain	0	1 (3.1%)	1 (2.0%)	1 (1.8%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 3	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 2	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Grade 3	1 (5.3%)	0	1 (2.0%)	1 (1.8%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 3	0	0	0	0
Grade 5	0	0	0	1 (1.8%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Grade 1	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Procedural pain	0	1 (3.1%)	1 (2.0%)	2 (3.6%)
Grade 2	0	1 (3.1%)	1 (2.0%)	1 (1.8%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Grade 2	0	0	0	1 (0.9%)
Grade 3	1 (2.2%)	1 (1.9%)	2 (2.1%)	2 (1.8%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Periorbital oedema	0	0	0	1 (1.8%)
Grade 1	0	0	0	1 (1.8%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 3	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 2	2 (4.4%)	2 (3.8%)	4 (4.1%)	4 (3.5%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 2	0	0	0	0
Deafness unilateral	0	0	0	0
Grade 2	0	0	0	0
Sudden hearing loss	0	0	0	0
Grade 2	0	0	0	0

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Grade 2	0	1 (1.9%)	1 (1.0%)	1 (0.9%)
Grade 3	0	1 (1.9%)	1 (1.0%)	1 (0.9%)
Acute and chronic thyroiditis	0	1 (1.9%)	1 (1.0%)	1 (0.9%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under "MMB" column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Oral soft tissue haemorrhages	0	1 (6.7%)	1 (3.4%)	1 (3.1%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Grade 5	3 (6.0%)	2 (2.9%)	5 (4.2%)	6 (4.3%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019

Febrile disorders	5 (10.0%)	3 (4.3%)	8 (6.7%)	15 (10.9%)
Grade 1	3 (6.0%)	3 (4.3%)	6 (5.0%)	11 (8.0%)
Grade 2	1 (2.0%)	0	1 (0.8%)	2 (1.4%)
Grade 3	1 (2.0%)	0	1 (0.8%)	2 (1.4%)

SAF-Anemic Analysis includes subjects in the Safety Population with Baseline Hemoglobin < 10 g/dL.
Adverse events were mapped according to MedDRA Version 22.0
Multiple AEs were counted only once per subject for each SOC, HLT, and PT.
SOCs, HLTs (within each SOC), PTs (within each SOC) were presented by descending order of frequency under the last column.
TEAE = Treatment-Emergent Adverse Event; SOC = System Organ Class; HLT = High Level Term; PT = Preferred Term

Data Extracted: CRF data: 01JUL2019
